## ABOUT THE LINE

We have created 11 botanical perfumes pieced together from natural essential oils. Fresh, floral, fougere, woody, oriental – here bright citrus notes are exquisitely accompanied by herbs, magical flowers exhale fragrance against spices, syrupy balsamic nuances artfully interlace with the dance of woody aromas.

In accordance with all perfumery rules, we have selected the notes of a fragrance – top, heart, and base – so that its unveiling is gradual and multilayered.

The image features three tulips against a plain, light-colored background. On the left is a large, light pink tulip in full bloom. In the lower center is a smaller magenta tulip. On the right is a dark purple tulip, which is partially cut off by the edge of the frame. Green leaves are visible at the base of the flowers.

The combination of essential oils also determines the general aromatherapy effect of the fragrance – they tone, invigorate, fill with energy or calm, lull, and harmonize emotions.
