Mom & Baby herbal care

Features of the series

- Ingredients of plant origin
- Ph-neutral for skin
- Does not irritate the eyes
- Hypoallergenic
- Suitable for daily use since birth

Active ingredients

Hamamelis floral water – effectively reduces inflammation and itching, soothes, reduces skin redness, forces damaged skin healing.

Chicory is rich in inuline, eliminates cradle cap.

Mallow – fights diaper rash.

Lavender essential oil – provides soft delicate aroma which gently soothes a baby's nervous system, creating the sense of protection and sets for quiet sleep.

Sun Care

Benefits of our filters:

- Transparency: invisible on the skin, no white traces,
- Photostability: do not degrade or oxidize in the sunlight,
- Sustainability: SPF is effective during all the application time,
- Safety: do not cause irritation.

Active ingredients

Cornflower floral water – soothes the skin after exposure to the sun. Shea, sesame, jojoba, macadamia, almond, coconut natural oils nourish, moisturize and smooth the skin down.

Botanical components: aloe, wheat proteins, chamomile, green tea, mallow and melissa extracts, panthenol and vitamin E – moisturize and protect skin from overdrying in the sun.

Carrot oil, rich in β -carotene, and calendula extract – promote melanin production, contribute to tan enhancement and preservation.

Natural detox cosmetics

Botavikos detox product line is an affordable natural skin care and hair care range for young residents of modern cities.

Firstly, the cosmetic line solves the classic youth skin problems: rashes, acne, large pores, excessive sebum.

As an additional effect we have chosen protection against negative environmental factors which reduce the antioxidant reserves of skin tissue and induce the skin to lose its tonicity and smoothness.

ACTIVE INGREDIENTS

The active ingredients of the formulas — plant extracts, antioxidants, natural prebiotics, vitamins, vegetable oils, minerals, useful acids — are selected for delicate effective cleansing, detoxification, high-quality moisturizing, restoration of skin flora and hair structure, and protection from external factors.

ANTI-POLLUTION COMPLEX

A unique combination of amino acids — betaine, proline, serine, and inositol — which not only **protect the skin** from the effects of extreme weather, but also from the negative effects of artificial blue light or HEV radiation.

Natural massage aroma candle and interior scents (deco-bouquettes)

Eight interior scents and aromatic candles are eight fantasy aromas created as a result of eight bold ideas – pure creativity as it is.

Each scent can tell an individual story. There is a summer blooming garden, dynamic citrus freshness, vanilla sweetness of a night after ardent heat.

Energetic and fresh, powdery and dreamy. Some of them are created to shake you up and fill with energy, and the others will become a flawless background for a rest and meditation.

There are no pure rose or mandarin aromas in our collection, we find this approach a bit boring. Even a well-known and classic orange and cinnamon blend is wrapped in refined wood and floral mist. We play fair and square by the perfumery rules and select the aspects of each aroma in an artistic fashion, hacking away at the unessential. The scents consisting of 7-11 essential oils with masterfully built aromas open out gradually. We get to know it better when moving from the top notes to the heart ones, and little by little opening a magnificent base note which unavoidably will become a surprising discovery. Witnessing this magic fragrant transformation is a pure pleasure.

Perfume oil

We have created 11 botanical perfumes created from natural essential oils. Fresh, floral, fougere, wood, oriental – here bright citrus notes are accompanied by herbs, magical flowers exhale fragrance against spices, syrupy balsamic nuances artfully interlace into the dance of wood aromas.

In accordance with all perfumery rules, we have selected the notes of a fragrance – top, heart, and base ones – so that its unveiling is gradual and multi-layered.

The combinations of essential oils also determine general aromatherapy effect of the fragrances – they tone, invigorate, fill with energy or, on the contrary, calm, lull, and harmonize emotions.

Essential oils

Essential oils represent aromatic volatile components of medicinal plants, herbs, fruits, seeds, etc.

In our classification all the scents are divided by the aroma warmth: starting from cold alpine ultramarine corresponding to a fresh citrus line, to the warmest one – carmelite, floral symbol of wood series scents.

Colours of each of the eight series are represented on the packages of the essential and beauty oils, allowing to identify the warmth of the essential oil sounding and to pick necessary scents to create an aromatic composition.

Recommended methods of essential oil application

- Creation of perfume compositions
- Room perfuming
- Cosmetic product enrichment
- Massage
- Baths and sauna

Natural cosmetic oils

Cosmetic oils line is created for facial and body care, it restores hair and strengthens nails. The oils are easily absorbed, nourish and saturate. have refreshing and restorative effect, increase firmness and elasticity, protecting the skin and hair from adverse external factors.
