Botavikos

Russian manufacturer of natural cosmetics, supplier of a wide range of essential and vegetable oils for aromatherapy and natural perfumes

More than **300**

unique products for hair, face skin and body, enriched with complexes of natural ingredients and compositions of essential oils.

30

Natural fatty oils and butters, from apricot to cotton, are included in all cosmetics of the brand.

83

Botavikos offers natural essential oils, from calamus to elemi. This is the widest palette on the market. Also, these essential oils are part of aromatic compositions of different cosmetic products.

FRESH

A fresh solution - the modern brand Botavikos discovers an endless world of natural fragrances and herbal cosmetics.

ISO 9001

All raw materials are manufactured in accordance with the international quality standard ISO 9001. Only natural and safe ingredients are used in production.

**IFEAT
RPCA**

Botavikos is a member of International Federation of Essential Oils and Aroma Trades (IFEAT) and Russian Perfume and Cosmetic Association (RPCA). This means we comply with all the requirements for cosmetics manufacturers and adhere to the principles of rational use of natural resources.

ESSENTIAL OILS

Essential oils are aromatic, volatile components of medicinal plants, herbs, flowers, fruits, seeds, etc. These essential oils mainly present in specialized oil cells, glands or small internal channels of plants. They are produced by the plant for various reasons: as a pheromone to attract certain insects, as a defense against other insects, as a protection against certain diseases, and so on.

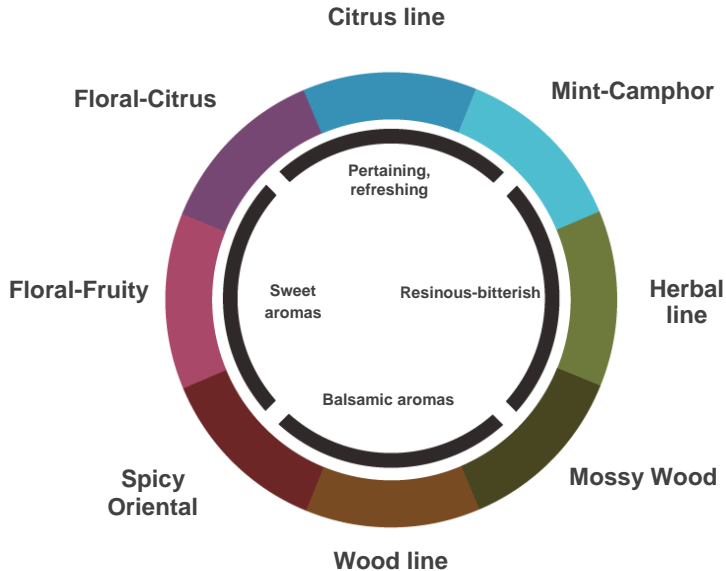

The amount of essential oil varies greatly from plant to plant and by type.

Essential oils can be liquid, waxy or solid. Depending on the color of substances they are composed of, essential oils can be colorless or colored in various shades of yellow, orange, red, blue or green.

CLASSIFICATION OF ESSENTIAL OILS

The basis for Botavikos essential oils classification was the works of Goethe, Itten, Septimus Piesse on color and musical theories, the principle of building a LAMBRE aroma map adopted in perfumery.

CITRUS

- lemongrass
- orange
- lime

- lemon
- clementine
- grapefruit

MINT-CAMPHOR

- wild mint
- eucalyptus

HERBAL

- rosemary
- clary sage

MOSSY WOOD

- Himalayan cedar
- juniper bark
- incense
- common juniper
- patchouli
- Siberian fir
- sandal wood

WOOD

- Norway spruce
- rosewood
- tea tree
- Scots pine

SPICY ORIENTAL

- sweet basil
- clove
- ginger
- cinnamon
- thyme

FLORAL-FRUITY

- Spanish jasmine
- ylang-ylang
- lavender
- neroli
- Damask rose

FLORAL-CITRUS

- bergamot
- mandarin
- lemon verbena
- Melissa Officinalis

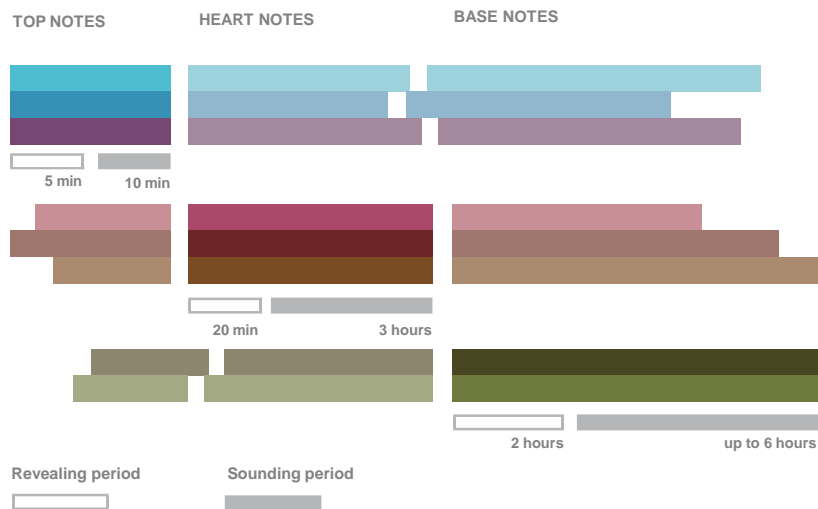

In our classification, **all aromas are divided according to the warmth of their sound**: from the cold alpine ultramarine which corresponds to the pertaining refreshing citrus line, to the warmest - carmelite, the color symbol of the wood line aromas.

The colors of each of the 8 lines are shown on the package of essential oils and beauty oils, which allows you to determine the warmth of the essential oil sound and select the aromas needed to create the composition.

Left side of the scheme represents lines of **sweeter aromas**: amethyst floral-citrus, fuchsia Baghdad floral-fruity, almandine spicy oriental. **Right side of the scheme** represents lines of **more bitter resinous aromas**: azure mint-camphor, ophitic herbal, mossy wood of Neapolitan lime color.

The vertical arrangement of aromas reflects the rate of their evaporation.

The higher the essential oil is located, the more volatile it is. The aroma is revealed gradually - at the very beginning, the top bright notes sound and disappear, they are the most short-lived and transparent. Their revealing period is 5 minutes, and the sounding period is 10 minutes. Then the heart notes of the fragrance gradually appear, revealing within 20 minutes and lasting for about 3 hours. After a while, we sense the base (trail) notes, the lower part with the weakest evaporation. The period of their revealing is 2 hours, and they last for 6 hours.

When creating an aromatic composition, it is important to select all three notes - top, heart and base - delicately, so that the fragrance revealing is multifaceted and interesting. This can be achieved only through personal experiments and discoveries, gradually composing your own unique sounding melody.

HOW TO USE ESSENTIAL OILS?

Internal use

Although internal use of essential oils can be very effective, we advise against experimenting! Use them internally only under the supervision of a therapist. A very good knowledge of different oils is necessary, as some essential oils can be very dangerous if used wrong! We strongly discourage internal use of essential oils by children (under 6 years of age) and pregnant women. Never take more than 2 drops at once and never take more than twice a day.

Application rule:

1-2 drops diluted in a spoonful of honey, vegetable oil or herbal infusion. Never use more than twice a day.

Massage, bath, shower

Essential oils are ideal for use during a relaxing massage, soothing bath or refreshing shower. They easily penetrate the skin, providing a beneficial effect. Before use, first dilute them in a small amount of vegetable oil (such as sweet almond or jojoba oil).

Application rule:

For a massage or oil bath: 5 to 10 drops per 10 ml of fatty oil. Ideal for general body care, relaxation or to relieve muscle soreness.

ADVICE. Before applying an essential oil to the skin, it is recommended to do an allergy test first. Take a drop of the essential oil you wish to use and apply to your elbow. If your skin doesn't turn red or itchy within the first 24 hours, you don't have an allergy.

ADVICE. Always use organic vegetable oils to dilute essential oils. Argan, jojoba, and sweet almond oils are ideal as neutral carrier oils.

Body massage: 2.5% to 5% of essential oil or 5 to 10 drops per 10 mL of vegetable oil.

Face oil or cream: 1% of essential oil or 2 drops per 10 mL of vegetable oil or cream.

Aromatic bath: 3% to 5% of essential oil or 6 to 10 drops per 10 mL of vegetable oil.

Shampoo: 1-2% of essential oil or 2-4 drops per 10 mL of vegetable oil.

Local use: much higher concentrations (20%) are used for certain applications; for example, on muscles and joints, for antiparasitic purposes, etc. Such kind of use requires supervision of a therapist!

Inhalations and aromatherapy

Essential oil will fill your living and working space with pleasant fragrance. Use of electric evaporators which do not heat up the oils and produce very fine vapor is preferable. Evaporation for 15 minutes every hour is sufficient. This is a great way to soothe the throat and airways. Essential oils clear your nose, allowing you to breathe easily again. Add 2-3 drops into a bowl of hot water and inhale the steam for 5-10 minutes (warning: avoid irritating oils!)

The rule for using a diffuser or inhalation:

5 to 10 drops in a diffuser (or in hot water for inhalation) depending on your preference and the size of the room. Ideal for the treatment of bodily ailments (e.g. blockage or soreness of the airways) and mental disorders (e.g. restless sleep, fears, etc.).

ADVICE. Use an essential oil diffuser. It distributes the essential oil evenly, humidifies the air, and creates a pleasant fragrance and atmosphere in your home. Recommended room size: 10 to 30 m².

ADVICE. If you don't have a diffuser, you can diffuse a deliciously fragrant scent throughout your living room, bedroom, or office by adding one or more essential oils to an evaporating container and placing it on a heater.

SAFE USE OF ESSENTIAL OILS

1. Keep out of reach of children.
2. Never exceed recommended doses!
3. Some oils are only suitable for external use! Read on the package!
4. Not recommended for infants and children under three years of age!
5. Not recommended for use during pregnancy and lactation!
6. Caution is required when using essential oils for epilepsy, asthma, and heart disease.
7. If you accidentally swallow a large amount of an essential oil, drink some vegetable oil and contact a Poison Control Center.
8. Use a mixing agent (honey, neutral tablet, etc.) when taking essential oils.
9. Never apply undiluted essential oils directly to the skin. Dilute in a small amount of vegetable oil or neutral cream, gel or shampoo; they can also be used as bath oils.
10. Some components that are naturally present in essential oils can cause allergic reactions in people with hypersensitivity (for example, citral, d-limonene, linalool, geraniol, citronellol, etc.). Please read the warnings on the package! Tip: For sensitive, allergic skin, add a drop of essential oil into a vegetable oil (such as sweet almond oil) and apply it to the crook (inside) of your elbow. Wait for 24 hours. If there are no signs of redness, itching and irritation, the oil can be used with confidence.
11. All citrus oils (made from the peel of bergamot, orange and lemon, grapefruit or mandarin) are photosensitive! Avoid sun exposure and do not use a tanning room for at least 12 hours after applying citrus oil to your skin!
12. Avoid contact with eyes and mucous membranes! In case of accidental contact, rinse with plenty of clean water. If irritation persists for a long time or in case of visible injury, consult with an ophthalmologist.
13. Do not use as eye or ear drops.
14. Essential oils of thymus, thyme, oregano, clove, wintergreen and cinnamon cause irritation. Do not swallow, vaporize or apply these oils undiluted to the skin!
15. Regular use or intake of essential oils is not recommended.
16. Essential oils are combustible and volatile. Do not expose them to high temperatures!
17. Store essential oils in a cool, dark place in a tightly closed bottle!

“LEMONGRASS”

Cymbopogon Flexuosus

Country of origin: *India*

Production method: *steam distillation*

Part of the plant used: *herbal part*

The aroma of lemongrass oil is intense, bright, citrusy, sweetish, with floral tint, fresh grassy green nuances, spicy and harsh aspects. Woody and waxy nuances can be distinguished.

COSMETIC EFFECT:

- recommended for enriching cosmetic products aimed at nourishing and toning the skin
- increases elasticity, improves complexion
- reduces visible skin imperfections
- reduces oiliness of the skin, makes pores less visible
- used to prevent cellulite and striae
- improves oily hair

PSYCHO-EMOTIONAL EFFECT:

- improves mood, gives a charge of vivacity
- a natural aphrodisiac

HOUSEHOLD USE:

- in everyday life, has repellent effect against mosquitoes and domestic fleas
- used for wet cleaning
- for air aromatization

“LEMON”

Citrus Limon

Country of origin: *Spain*

Production method: *cold pressing*

Part of the plant used: *peel*

The essential oil of lemon has a bright characteristic smell, fresh, juicy, sour, and very characteristic candy cool aspect. Cold-pressed oil is harsh, rather pertaining, has nuances of fresh greenery and woody tones.

COSMETIC EFFECT:

- recommended for enriching cosmetic products aimed at improving skin firmness and elasticity
- reduces oiliness of the skin, makes pores less visible
- improves complexion, makes pigmentation less noticeable
- fights against brittleness and delamination of nails, restores their natural color

PSYCHO-EMOTIONAL EFFECT:

- stimulates and tones
- helps to overcome stress
- gives an energy boost and positivity

HOUSEHOLD USE:

- a natural repellent, repels mosquitoes and moths
- aromatizes the air, neutralizes unpleasant odors
- used for wet cleaning

CITRUS LINE

“SWEET ORANGE”

Citrus Senensis Osbeck

Country of origin: Brazil

Production method: cold pressing

Part of the plant used: peel

The scent of sweet orange essential oil is sweet, optimistic and joyful. In the aroma of sweet orange essential oil, the main tone is sonorous and light, it is accompanied by waxy, slightly harsh and spicy notes of peel. After a while, aspects of the heavier compounds of the terpenic series can be distinguished, they give the essential oil a certain woody, slightly coniferous nuance.

COSMETIC EFFECT:

- recommended for enriching cosmetic products aimed at cleansing and narrowing pores, and improving skin elasticity
- improves complexion, produces a light brightening effect
- promotes the removal of excess moisture, helps in the fight against cellulite

PSYCHO-EMOTIONAL EFFECT:

- improves mood
- helps to relax, reduces anxiety
- promotes better sleep
- it is an aphrodisiac

HOUSEHOLD USE:

- for air aromatization
- for wet cleaning

“LIME”

Citrus Aurantifolia

Country of origin: Mexico

Production method: steam distillation

Part of the plant used: peel

Lime oil has a refreshing citrusy bitter smell and it is perhaps the greenest and most harsh of all citrus fruits. It has a high content of heavy terpenes, which give the oil a specific woody-resinous tint - lime oil is easy to recognize by its characteristic spicy note and a specific slightly rubbery, camphor-turpentinic nuance.

COSMETIC EFFECT:

- recommended for enriching cosmetic products aimed at mature facial skin
- reduces visible skin imperfections
- has a brightening effect, improves complexion
- removes excess moisture
- improves oily skin and hair
- strengthens and whitens nails

PSYCHO-EMOTIONAL EFFECT:

- allows to harmonize the nervous system
- a natural aphrodisiac

HOUSEHOLD USE:

- in everyday life, has repellent effect against flies and mosquitoes
- used for wet cleaning
- for air aromatization

“CITRUS (CLEMENTINE)”

Citrus Clementina

Country of origin: Morocco

Production method: cold pressing

Part of the plant used: peel

Clementine essential oil is one of the sweetest among citrus fruits. It has a bright, juicy refreshing citrus aroma, but at the same time it has a characteristic, slightly confectionery nuance of peel, reminiscent of dried citrus peels, candied fruit and marmalade.

COSMETIC EFFECT:

- recommended for enriching cosmetic products aimed at softening the skin, making it velvety and elastic
- moisturizes, improves skin firmness and elasticity
- reduces visible skin imperfections
- produces an anticellulite effect

PSYCHO-EMOTIONAL EFFECT:

- soothes the nervous system, promotes relaxation
- promotes comfortable restful sleep

HOUSEHOLD USE:

- used for wet cleaning
- it is a natural air flavor

“GRAPEFRUIT”

Citrus Paradisi

Country of origin: USA

Production method: cold pressing

Part of the plant used: peel

The aroma of grapefruit essential oil is reminiscent of sweet orange oil, but a certain bitterness inherent in some exotic tropical fruits is present. This aspect of the smell makes grapefruit related to guava, passion fruit, and even partly to blackcurrant.

COSMETIC EFFECT:

- recommended for enriching cosmetics
- aimed at improving the protective functions of the skin
- stimulates regeneration in acute skin conditions
- helps to normalize sweating
- stimulates hair growth and protects the scalp
- from overdrying

PSYCHO-EMOTIONAL EFFECT:

- restores strength
- gives a charge of vivacity

HOUSEHOLD USE:

- for wet cleaning
- for air aromatization

“WILD MINT”

Mentha Arvensis

Country of origin: Brazil

Production method: steam distillation

Part of the plant used: flowers and greenery

Wild mint essential oil has a characteristic sharp sweetish, fresh, juicy, green herbal invigorating and cooling aroma. Mint oil causes a characteristic “cooling” effect on the skin.

COSMETIC EFFECT:

- recommended for enriching cosmetic products aimed at cleansing and freshening the skin
- improves complexion
- promotes pore contraction and oily skin improvement
- fights against skin imperfections
- enhances the protective functions of the skin
- accelerates the healing of minor skin lesions

PSYCHO-EMOTIONAL EFFECT:

- helps to restore physical and emotional strength
- gives a charge of vivacity

HOUSEHOLD USE:

- suitable for indoor air purification
- has a repellent effect against midges and flies
- used for wet cleaning

“EUCALYPTUS”

Eucalyptus Globulus

Country of origin: China

Production method: steam distillation

Part of the plant used: leaves

The top, most volatile components have a fresh, cooling, minty, slightly metallic tint, with a delicate citrus bitterness. The main tone is woody, camphor, harsh and balsamic, sweetish, with bright herbaceous and floral aspects, peppery spice aspects. The base notes are woody with an earthy nuance.

COSMETIC EFFECT:

- recommended for enriching cosmetic products aimed at care for oily and problematic skin
- refreshes and soothes the skin
- stimulates regeneration, improves skin imperfections
- promotes strengthening of hair and reduces dryness of the scalp
- promotes relaxation of the body after intense physical exertion

PSYCHO-EMOTIONAL EFFECT:

- gives a charge of vivacity, increases energy
- relieves headaches caused by stuffiness or fatigue

HOUSEHOLD USE:

- produces a repellent effect against midges, flies and cockroaches
- used for wet cleaning
- it is a natural air flavor

“ROSEMARY”

Rosmarinus Officinalis

Country of origin: Spain

Production method: steam distillation

Part of the plant used: leaves and stems

The scent of rosemary essential oil is strong, fresh, herbal, pure with cool mint and eucalyptus notes. Camphor, woody, coniferous and balsamic aspects are also noticeable.

COSMETIC EFFECT:

- recommended for enriching cosmetic products aimed at nourishing and improving oily skin
- makes pores less visible
- reduces oily sheen on skin
- makes skin smoother, improves complexion
- improves skin firmness, smooths wrinkles
- removes excess moisture, fights cellulite
- strengthens hair and reduces dandruff

PSYCHO-EMOTIONAL EFFECT:

- gives a charge of vivacity and energy
- it is a warming aphrodisiac

HOUSEHOLD USE:

- used for wet cleaning
- it is a natural air flavor

“CLARY SAGE”

Salvia Sclarea

Country of origin: France

Production method: steam distillation

Part of the plant used: inflorescences and leaves

The scent of sage essential oil is fresh, herbal, sweetish, woody, with floral notes (geranium, lilac, lavender), spicy camphor eucalyptus notes.

COSMETIC EFFECT:

- recommended for enriching cosmetic products aimed at rejuvenating and toning the skin
- accelerates regeneration, prepares muscles for sports
- improves oily scalp, helps to get rid of dandruff
- softens rough areas, removes peeling, microlesions, cracks
- strengthens nails
- controls perspiration

PSYCHO-EMOTIONAL EFFECT:

- calms, reframes thoughts in a positive way
- helps to improve sleep

HOUSEHOLD USE:

- produces a repellent effect against flies and midges
- reduces discomfort after insect bites
- used for wet cleaning
- it is a natural air flavor

MOSSY WOOD LINE

“HIMALAYAN CEDAR”

Cupressus Funebris

Country of origin: China

Production method: steam distillation

Part of the plant used: trunk and branches

An oil with a characteristic dry woody aroma. The aroma of cedar oil has a deep ambery and milky undertones. It has warm animalistic notes, leathery, floral-fruity undertones, a discreet camphor accent and a nuance of cistus.

COSMETIC EFFECT:

- recommended for enriching cosmetics
- aimed at smoothing and improving skin firmness
- stimulates skin regeneration processes
- reduces visible skin imperfections and soothes the skin
- removes excess moisture, tightens the skin
- protects the skin of hands during intensive physical work
- improves the condition of nails

PSYCHO-EMOTIONAL EFFECT:

- has a beneficial effect on the emotional background, creating a comfortable state of the soul
- helps to focus, increases concentration
- promotes comfortable and healthy sleep

HOUSEHOLD USE:

- produces a repellent effect against mosquitoes and moth
- used for wet cleaning
- it is a natural air flavor

“JUNIPER BARK”

Juniperus Oxycedrus

Country of origin: Spain

Production method: vacuum distillation

Part of the plant used: bark

The scent of the oil is sharp, smoky, tarry, burnt, with leathery, phenolic, medicinal and animalistic undertones.

COSMETIC EFFECT:

- recommended for enriching cosmetic products aimed at high-quality daily care for any type of skin
- Helps to clean and shrink pores, helps to smooth the skin
- cares for hair, stimulating their growth and restoring shine

PSYCHO-EMOTIONAL EFFECT:

- gives inner harmony
- increases working capacity
- promotes restful healthy sleep
- a natural aphrodisiac

HOUSEHOLD USE:

- purifies indoor air
- used as an agent against fleas and ticks in pets
- used for wet cleaning

“INCENSE”

Boswellia Carterii

Country of origin: *Somali*

Production method: *steam distillation*

Part of the plant used: *resin*

The aroma of incense oil opens with intense green and citrus notes (lemon, mandarin) with harsh spice nuances reminiscent of ginger, the main tone of the incense aroma is woody-balsamic, similar to the smell of old wood, a little camphor with nuances of eucalyptus, with resinous and coniferous tints. The base notes of incense essential oil have amber and vanilla aspects.

COSMETIC EFFECT:

- recommended for enriching cosmetic products aimed at nourishing and improving oily skin
- makes pores less visible and more clean
- eliminates visible skin imperfections
- stimulates regeneration
- helps to strengthen hair follicles

PSYCHO-EMOTIONAL EFFECT:

- has a calming and relaxing effect
- promotes comfortable sleep
- a natural aphrodisiac

HOUSEHOLD USE:

- used for wet cleaning
- for air aromatization

“COMMON JUNIPER”

Juniperus Communis

Country of origin: *India*

Production method: *steam distillation*

Part of the plant used: *galbulus*

The aroma of juniper essential oil is fresh, balsamic, woody-coniferous, herbaceous. Juniper essential oil has a bright citrus grapefruit start, warm spicy pepper notes, an earthy fruity powdery note that slightly resembles the smell of carrots, and a light pineapple nuance.

COSMETIC EFFECT:

- recommended for enriching cosmetic products aimed at care for any type of skin
- makes pores more clean and less visible
- removes excess moisture
- softens the skin of the feet, has an antifungal effect
- stimulates skin regeneration processes
- strengthens hair

PSYCHO-EMOTIONAL EFFECT:

- improves mood, invigorates
- increases working capacity
- promotes restful and healthy sleep
- a natural aphrodisiac

HOUSEHOLD USE:

- has repellent properties against fleas and ticks
- used for wet cleaning
- it is a natural air flavor

“PATCHOULI”

Pogostemon Cablin

Country of origin: *Indonesia*
Production method: *steam distillation*
Part of the plant used: *leaves*

Patchouli essential oil has a characteristic, powerful, woody, earthy, balsamic scent with spicy undertones and a recognizable mint-camphor mossy “mouldy” aspect that is often described as the smell of an old chest of clothes. However, the earthy camphor note of patchouli is quite elegant and gives a rather liquorice-fruity impression, accentuated by a sweet amber-musky, slightly animalistic, base tone.

COSMETIC EFFECT:

- recommended for enriching cosmetic products aimed at moisturizing, improving skin firmness and elasticity
- improves the appearance and condition of the skin
- fights against skin imperfections
- strengthens hair, protects against scalp over drying

PSYCHO-EMOTIONAL EFFECT:

- soothes, gives a feeling of peace
- powerful aphrodisiac

HOUSEHOLD USE:

- has a repellent effect against moth
- used for wet cleaning
- it is a natural air flavor

“SIBERIAN FIR”

Abies Sibirica

Country of origin: *Russia*
Production method: *steam distillation*
Part of the plant used: *needles*

The Siberian fir essential oil has a fresh green woody coniferous aroma with a pronounced resinous balsamic sweetish aspect and light earthy nuances.

COSMETIC EFFECT:

- recommended for enriching cosmetic products aimed at fights against skin imperfections
- improves skin smoothness
- promotes the removal of excess moisture
- helps to get rid of smelly feet

PSYCHO-EMOTIONAL EFFECT:

- tones
- gives a charge of vivacity and good mood
- increases working capacity and endurance

HOUSEHOLD USE:

- has a repellent effect against mosquitoes and wasps
- purifies the air, incl. from dust and mold
- used for wet cleaning

“SANDAL WOOD”

Amyris Balsamifera

Country of origin: *Haiti*
Production method: *steam distillation*
Part of the plant used: *wood material*

The aroma of sandalwood essential oil is perhaps one of the most complex, rich and harmonious: a warm, sweetish woody tone full of many nuances. Sandalwood essential oil has a mild but powerful and long lasting fragrance, pure, substantial and solemn, evoking the association with precious woods.

COSMETIC EFFECT:

- recommended for enriching cosmetic products aimed at improving skin firmness and skin tone
- improves oily skin and reduces acne
- enhances the protective functions
- helps to strengthen hair and nails

PSYCHO-EMOTIONAL EFFECT:

- brings sense of peace and deep relaxation
- calms, creates a meditative mood

HOUSEHOLD USE:

- used for wet cleaning
- air aromatization and purification
- used as an agent against fleas and ticks in pets

“VALERIAN”

Valeriana Officinalis

Country of origin: *China*

Production method: *steam distillation*

Part of the plant used: *root*

Valerian essential oil has a characteristic balsamic, delicate earthy, harsh scent, with fresh green nuances and ethereal sour notes reminiscent of overripe fruit. Valerian oil has warm woody base notes with spicy, animalistic and musky aspects.

COSMETIC EFFECT:

- recommended for enriching cosmetics
- aimed at improving the protective properties of the skin
- helps with allergies to cold and sunburn
- helps to reduce hypersensitivity

PSYCHO-EMOTIONAL EFFECT:

- helps to calm
- promotes quality sleep
- relieves condition at migraines

HOUSEHOLD USE:

- for wet cleaning
- for air aromatization

“CYPRESS”

Cupressus Sempervirens

Country of origin: *France*

Production method: *vacuum distillation*

Part of the plant used: *leaves, branches and cones*

The essential oil obtained from cypress, has a fresh, coniferous, woody aroma. In the scent of cypress oil, earthy, dry spicy aspects, a bright resinous citrus-balsamic incense accent and a delicate amber tone are clearly distinguishable.

COSMETIC EFFECT:

- recommended for enriching cosmetic products aimed at care for problematic face skin
- reduces imperfections, improves oily skin
- helps to make pores less visible and more clean
- stimulates skin regeneration processes, strengthens hair and stimulates hair growth

PSYCHO-EMOTIONAL EFFECT:

- produces an invigorating, motivating effect
- helps to concentrate, tones the body
- relieves fatigue

HOUSEHOLD USE:

- in everyday life, has a repellent effect against insects including tropical ones
- used for wet cleaning
- for air aromatization

“NORWAY SPRUCE”

Picea Abies

Country of origin: *Russia*

Production method: *steam distillation*

Part of the plant used: *needles*

The scent of rosemary essential oil is strong, fresh, herbal, pure with cool mint and eucalyptus notes. Camphor, woody, coniferous and balsamic aspects are also noticeable.

COSMETIC EFFECT:

- recommended for enriching cosmetics
- aimed at improving the protective functions of the skin
- stimulates skin regeneration
- helps to normalize sweating
- stimulates hair growth and protects the scalp from over-drying

PSYCHO-EMOTIONAL EFFECT:

- restores strength
- gives a charge of vivacity

HOUSEHOLD USE:

- for wet cleaning
- for air aromatization

“ROSEWOOD”

Aniba Rosaeodora

Country of origin: *Brazil*

Production method: *steam distillation*

Part of the plant used: *wood material*

The aroma of rosewood essential oil is sweet, woody, slightly spicy, with floral-fruity tones. The initial notes are fresh, citrus, reminiscent of bergamot, the main tone is floral with delicate spice nuances (rose, lavender) with a subtle camphor and coniferous aspect.

COSMETIC EFFECT:

- recommended for enriching cosmetic products aimed at improving complexion and promoting healthy shine
- improves skin texture, has an exfoliating effect
- moisturizes and enhances the protective functions of the skin
- reduces skin sensitivity

PSYCHO-EMOTIONAL EFFECT:

- recovers inner harmony
- promotes deep relaxation
- increases strength after emotional overload
- it is a bright erogenous fragrance

HOUSEHOLD USE:

- used for wet cleaning
- for air purification and aromatization

WOOD LINE

“TEA TREE”

Melaleuca Alternifolia

Country of origin: *China*

Production method: *steam distillation*

Part of the plant used: *branches with leaves*

Tea tree essential oil has a bright, sharp, fresh, woody-spicy aroma. Nuances of cardamom and nutmeg can be distinguished in it. Tea tree essential oil has herbaceous, refreshing, and somewhat medicinal mint-camphor, nutty, and pine-terpene aspects.

COSMETIC EFFECT:

- recommended for enriching cosmetics
- aimed at improving oily skin and skin imperfections
- helps to sooth the skin
- stimulates skin regeneration
- has an antibacterial effect
- regulates sebaceous gland functions

PSYCHO-EMOTIONAL EFFECT:

- sets for harmony
- reduces negative emotions and thoughts
- gives a charge of vivacity, increases working capacity

HOUSEHOLD USE:

- soothes the skin after insect bites
- disinfects air
- used for wet cleaning

“SCOTS PINE”

Pinus Sylvestris

Country of origin: *Russia*

Production method: *steam distillation*

Part of the plant used: *needles*

Pine essential oil has a characteristic refreshing light green woody coniferous scent with balsamic, resinous and dry earthy aspects.

COSMETIC EFFECT:

- recommended for enriching cosmetic products aimed at improving general condition and appearance of the skin
- increases skin regeneration
- increases skin firmness and tightness
- regulates sebaceous gland functions
- facilitates the restoration of damaged hair

PSYCHO-EMOTIONAL EFFECT:

- gives a charge of vivacity and optimism
- carries a fresh energy boost

HOUSEHOLD USE:

- has a repellent effect against domestic fleas
- aromatizes the air, neutralizes unpleasant odors
- used for wet cleaning

“SWEET BASIL”

Ocimum Basilicum

Country of origin: *India*

Production method: *steam distillation*

Part of the plant used: *leaves and inflorescences*

The aroma of basil essential oil is reminiscent of the smell of anise and tarragon, it is dominated by sweet-spicy notes, accentuated by grassy green, citrus and spice nuances.

COSMETIC EFFECT:

- recommended for enriching cosmetics
- aimed at improving oily skin
- improves complexion
- refreshes and tones the skin
- reduces visible skin imperfections, makes pores less visible
- nourishes and stimulates hair restoration

PSYCHO-EMOTIONAL EFFECT:

- helps with over-strain
- promotes better quality of sleep

HOUSEHOLD USE:

- in everyday life, has a repellent effect against mosquitoes and midges
- for wet cleaning
- for air aromatization

“GINGER”

Zingiber Officinale

Country of origin: *India*

Production method: *steam distillation*

Part of the plant used: *root*

The aroma of ginger essential oil is bright and contrasting - with a cool citrus herbaceous top note, fresh camphor woody aspects reminiscent of laurel and myrtle essential oil, cardamom aspect with a slight metallic note.

COSMETIC EFFECT:

- recommended for enriching cosmetic products aimed at improving skin firmness and elasticity
- makes pores less visible and more clean
- has lightening and antibacterial properties
- nourishes the hair roots, strengthens them, activates hair growth

PSYCHO-EMOTIONAL EFFECT:

- fills with positive energy
- provides inspiration and confidence
- relieves conditions at headaches, migraines, nausea
- a natural aphrodisiac

HOUSEHOLD USE:

- in everyday life, has repellent effect against mosquitoes
- used for wet cleaning
- for air aromatization

“STAR ANISE”

Illicium Verum

Country of origin: *China*

Production method: *steam distillation*

Part of the plant used: *seeds*

Essential oil of star anise (badian), obtained from seeds, has a pure sweet anise aroma, somewhat similar to the aroma of essential oils of fennel, tarragon, with a pronounced grassy, liquorice, resinous-balsamic slightly phenolic nuance.

COSMETIC EFFECT:

- recommended for enriching cosmetic products aimed at improving skin firmness and elasticity
- helps to moisturize and smooth the skin
- promotes skin regeneration
- helps to fight cellulite

PSYCHO-EMOTIONAL EFFECT:

- helps to cope with stress
- improves sleep quality
- it is an aphrodisiac

HOUSEHOLD USE:

- repellent effect against mosquitoes, lice, cockroaches, bedbugs, moths
- for wet cleaning
- for air aromatization

“CLOVE”

Eugenia Caryophyllata

Country of origin: Madagascar

Production method: steam distillation

Part of the plant used: leaves

The oil has a sharp sweet spicy herbaceous clove smell. In the aroma of clove essential oil, warm woody, balsamic, light vanilla and slightly smoky nuances are distinguished.

COSMETIC EFFECT:

- recommended for enriching cosmetic products aimed at improving skin firmness and elasticity
- makes pores less visible and more clean
- has lightening and antibacterial properties
- nourishes the hair roots, strengthens them, activates hair growth

PSYCHO-EMOTIONAL EFFECT:

- fills with positive energy
- provides inspiration and confidence
- relieves conditions at headaches, migraines, nausea
- a natural aphrodisiac

HOUSEHOLD USE:

- in everyday life, has repellent effect against mosquitoes
- used for wet cleaning
- for air aromatization

“CINNAMON”

Cinnamomum Cassia

Country of origin: China

Production method: steam distillation

Part of the plant used: leaves

The essential oil has a deep and sweet warm, spicy woody-spicy scent reminiscent of cinnamon and clove, with herbal, woody and vanilla-balsamic aspects.

COSMETIC EFFECT:

- recommended for enriching cosmetic products aimed at toning the skin
- increases skin firmness and elasticity
- improves complexion
- improves rough skin areas
- cares for weak hair, strengthening it and reducing hair loss

PSYCHO-EMOTIONAL EFFECT:

- has a positive effect on the psycho-emotional sphere, reduces fears and worries
- invigorates, pacificates
- it is an aphrodisiac, it enhances sexuality

HOUSEHOLD USE:

- in everyday life, has a repellent effect against insects including tropical ones
- used for wet cleaning
- for air aromatization

“THYME”

Thymus Vulgaris

Country of origin: Spain

Production method: steam distillation

Part of the plant used: leaves

The aroma of thyme essential oil is fresh, herbaceous, spicy, reminiscent of thymus, sage and cumin, with camphor medicinal and spicy phenolic aspects.

COSMETIC EFFECT:

- recommended for enriching cosmetic products aimed at improving visible skin imperfections
- visibly refreshes mature skin
- restores damaged hair
- helps to eliminate calluses

PSYCHO-EMOTIONAL EFFECT:

- tones, stimulates vitality
- reduces symptoms of chronic fatigue
- improves sleep quality
- a natural aphrodisiac

HOUSEHOLD USE:

- helps with insect bites
- used for wet cleaning
- for air aromatization

“SPANISH JASMINE”

Jasminum Grandiflorum

Country of origin: *India*

Production method: *steam distillation*

Part of the plant used: *flowers*

The scent of jasmine is deep, hypnotic, sweet and very floral. In the aroma, one can distinguish the first light ethereal notes, fresh, green and grassy shades, a slight waxy nuance, fruity aspects, primarily pear and tropical, sweetish nuances reminiscent of fruit jam. The aroma of jasmine is very diffuse, easily spreading around, filling the space with an amazing fragrance.

COSMETIC EFFECT:

- recommended for enriching cosmetic products aimed at care for dry and sensitive skin
- helps to reduce the feeling of tightness and peeling
- visibly refreshes mature skin, improves its elasticity
- protects from external exposures

PSYCHO-EMOTIONAL EFFECT:

- helps to cope with stress
- promotes restitution, energizes

HOUSEHOLD USE:

- used for wet cleaning
- it is a natural air flavor

“YLANG-YLANG”

Cananga Odorata

Country of origin: *Madagascar*

Production method: *steam distillation*

Part of the plant used: *flowers*

The aroma is bright, rich, floral-fruity. The top light notes are ethereal, fresh, with a touch of flower petals, with a delicate mint-camphor component, referring to wintergreen. The main tone is floral, reminiscent of the aromas of jasmine, neroli and lily, with tints of pear, bananas and exotic tropical fruits, and with a subtle creamy vanilla nuance.

COSMETIC EFFECT:

- recommended for enriching cosmetic products, aimed at gentle skin care, moisturizes the skin, reduces peeling, improves skin firmness and elasticity
- used as a natural additive in intimate hygiene products
- fixes suntan, soothes the skin after sunbathing
- helps to strengthen hair roots
- strengthens hair, reduces brittleness and delamination of nails

PSYCHO-EMOTIONAL EFFECT:

- promotes deep relaxation, brings joy and peace
- has a powerful erotic meaning, awakening passion and sensuality

HOUSEHOLD USE:

- in everyday life, has repellent properties against mosquitoes
- used for wet cleaning

FLORAL-FRUITY LINE

“CAJEPUT”

Melaleuca Cajuputi

Country of origin: *Indonesia*

Production method: *steam distillation*

Part of the plant used: *leaves*

It has a very intense, penetrating fresh green herbaceous smell, delicately sweet, harsh and cold, mostly reminiscent of eucalyptus and rosemary. The scent of the oil has a pronounced camphor note, complex aromatic aspects and a light woody-fruity tint.

COSMETIC EFFECT:

- recommended for enriching cosmetic products aimed at care for problematic face skin
- reduces imperfections, improves oily skin
- helps to make pores less visible and more clean
- promotes skin regeneration
- strengthens hair and stimulates hair growth

PSYCHO-EMOTIONAL EFFECT:

- produces an invigorating, motivating effect
- helps to concentrate, tones the body
- relieves fatigue

HOUSEHOLD USE:

- in everyday life, has a repellent effect against insects including tropical ones
- used for wet cleaning
- for air aromatization

“LAVENDER”

Lavandula Hybrida

Country of origin: *France*

Production method: *steam distillation*

Part of the plant used: *inflorescences*

The aroma of lavender essential oil is fresh, herbaceous-floral, with light fruity nuances. The herbaceous aspect of lavender is dry, velvety, aromatic, with a delicate citrus accent reminiscent of bergamot, lime and petitgrain. The heart tone is light, floral, the base notes are sweet, woody-balsamic, with camphor and slightly phenolic overtones, hints of vanilla and Tonka bean.

COSMETIC EFFECT:

- recommended for enriching cosmetic products aimed at care for sensitive and damaged skin
- cleanses and refreshes all skin types
- improves skin imperfections, stimulates regeneration processes
- enhances hair growth, reduces breakage and hair loss

PSYCHO-EMOTIONAL EFFECT:

- helps to achieve harmony
- provides comfort sleep, eliminates insomnia
- it is an exquisite powerful aphrodisiac

HOUSEHOLD USE:

- has a repellent effect against moth
- used for wet cleaning
- it is a natural air flavor

“NEROLI”

Citrus Aurantium

Country of origin: Tunisia

Production method: steam distillation

Part of the plant used: flowers

The aroma of neroli is unusual, bright, but at the same time gentle and light. It combines floral (fleur d'orange, lily-of-the-valley), citrus and fruity aspects (alpine strawberries, grape). This aroma is very complex and multifaceted, its harsh and bitter grassy notes coexist with dry woody, balsamic and sweet, almost candy, nuances.

COSMETIC EFFECT:

- recommended for enriching cosmetic products aimed at smoothing and firming the skin
- increases skin firmness and elasticity
- moisturizes and nourishes dry and aging skin
- helps to soothe sensitive skin
- fights against visible skin imperfections
- strengthens hair
- helps to prevent dandruff

PSYCHO-EMOTIONAL EFFECT:

- soothes, gives a feeling of confidence and comfort
- raises spirits
- it is a powerful natural aphrodisiac

HOUSEHOLD USE:

- used for wet cleaning
- for air aromatization

“DAMASK ROSE”

Rosa Damascena

Country of origin: Turkey

Production method: steam distillation

Part of the plant used: flowers

The top notes of rose oil are light, green, herbal and slightly watery. The main floral tone is sweet, rich, dense, intoxicating, with pronounced spicy tints (clove, allspice) and fruity (including a note of tropical fruits, litchi), wine and honey nuances.

COSMETIC EFFECT:

- recommended for enriching cosmetic products aimed at skin rejuvenation, improving its elasticity and firmness
- gently cares for the skin around the eyes, reduces dark circles under the eyes and puffiness
- improves the complexion, has a lightening effect
- protects the skin from external exposures
- promotes lightening of striae
- restores hair structure, deeply nourishes hair

PSYCHO-EMOTIONAL EFFECT:

- soothes, is a source of harmony and peace
- raises spirits
- it is a powerful natural aphrodisiac
- improves sleep

HOUSEHOLD USE:

- used for wet cleaning
- for air aromatization

“GERANIUM”

Pelargonium Graveolens

Country of origin: Egypt

Production method: steam distillation

Part of the plant used: leaves and stems

The scent of geranium oil is complex, but very harmonious: the top notes are fresh, green, herbal, with citrus nuances, with a characteristic minty “chill” and a barely perceptible metallic fresh aspect. The heart tone of the oil is floral, sweetish, reminiscent of the aroma of a red rose with hints of neroli, freesia. Also, the aroma of geranium has pronounced spice aspects (clove, allspice) and fruity tones (pear, green grapes). The base notes are grassy, with woody and slightly earthy undertones.

COSMETIC EFFECT:

- recommended for enriching cosmetic products aimed at care for mature skin
- fights against skin imperfections
- helps make skin smoother

PSYCHO-EMOTIONAL EFFECT:

- inspires optimism, sets up positive emotions
- relaxes
- helps to fight headaches

HOUSEHOLD USE:

- in everyday life, has a repellent effect against mosquitoes and midges
- for wet cleaning
- for air aromatization

“BERGAMOT”

Citrus Aurantium Bergamia

Country of origin: Italy

Production method: cold pressing

Part of the plant used: peel

The aroma of bergamot essential oil is intense, refreshing, and at the same time quite complex and multi-component: the smell of bergamot combines a delicate floral tone (neroli, lavender osmanthus), a fresh juicy citrus aspect (lemon, orange), a harsh woody component and a green herbal nuance.

COSMETIC EFFECT:

- recommended for enriching cosmetic products aimed at nourishing and improving imperfect skin
- improves complexion, makes pigmentation less noticeable
- strengthens hair, reduces hair fragility and susceptibility to external factors
- helps to reduce dandruff, relieves itchy scalp

PSYCHO-EMOTIONAL EFFECT:

- soothes, relaxes
- liberates, inspires confidence
- a natural aphrodisiac

HOUSEHOLD USE:

- has a repellent effect against mosquitoes, flies and midges
- purifies the air, eliminates the smell of tobacco, burning, pets
- used for wet cleaning

“MANDARIN”

Citrus Reticulata

Country of origin: Spain

Production method: cold pressing

Part of the plant used: peel

The scent of mandarin oil is close to orange, with a pronounced cool, invigorating citrus tone. The methyl anthranilate ester gives the mandarin essential oil a special flowery-fruity shade (alpine strawberries, grapes, wine nuances). The aroma of mandarin is characterized by a distinct waxy aspect of peel, floral (neroli, lavender) and herbaceous-woody undertones.

COSMETIC EFFECT:

- recommended for enriching cosmetic products aimed at improving skin firmness and elasticity
- helps to fight against skin imperfections, makes pigmentation less visible
- promotes the removal of excess moisture, helps in the fight against cellulite

PSYCHO-EMOTIONAL EFFECT:

- warms, compensates for the lack of sun warmth and light
- in winter, maintains strength, improves mood
- promotes good-quality sleep

HOUSEHOLD USE:

- used for wet cleaning
- it is a natural air flavor

“LEMON VERBENA”

Lippia Citriodora

Country of origin: *Morocco*

Production method: *steam distillation*

Part of the plant used: *branches with leaves*

Lemon verbena essential oil is popular for its bright, joyful, sweetish aroma reminiscent of citrus (primarily lemon and lemongrass). The main component of this oil, citral, endows the aroma of verbena with a sweet candy citrus tone. Floral aspects (neroli, geranium, rose), fruity, woody and herbaceous nuances are also clearly distinguishable.

COSMETIC EFFECT:

- recommended for enriching cosmetic products aimed at soft care for any type of skin
- tones, firms, refreshes complexion
- improves skin elasticity
- promotes rapid muscle warm-up, facilitates recovery processes
- cares for hair, stimulates hair growth

PSYCHO-EMOTIONAL EFFECT:

- promotes quality sleep
- relieves the condition at headaches, dizziness, waves of nausea
- it is a mild aphrodisiac, awakens the sensuality of fantasy

HOUSEHOLD USE:

- in everyday life, has repellent effect against mosquitoes
- used for wet cleaning
- for air aromatization

“MELISSA”

Cymbopogon Winterianus

Country of origin: *Spain*

Production method: *steam distillation*

Part of the plant used: *leaves and stems*

Melissa essential oil due to the high content of citral, has an intense sweetish citrus aroma (reminiscent of lemon, lemongrass and citronella).

COSMETIC EFFECT:

- recommended for enriching cosmetics
- for oily and problematic skin care
- reduces visible imperfections
- makes pores less visible
- cares for lips
- normalizes oily hair
- cares for the skin of hands, nails, softens the cuticle

PSYCHO-EMOTIONAL EFFECT:

- reduces weather sensitivity and painful
- acclimatization
- increases working capacity
- normalizes sleep

HOUSEHOLD USE:

- in everyday life, has repellent effect against mosquitoes and cockroaches
- used for wet cleaning
- for air aromatization

NATURAL FATTY OILS

Vegetable oils are fats obtained by cold pressing from seeds, kernels, nuts and fruits of plants. Their composition is determined by a high concentration of free fatty acids, phytosterols, phospholipids, vitamins, macro- and microelements. Due to such a multicomponent nature, their value for cosmetology is achieved as they provide complex care for face and body skin, hair and nails. The predominance of one or another fatty acid determines the dominant cosmetic behavior of the oil: moisturizing, restoring, nourishing or toning.

There are liquid and solid vegetable oils. Liquid oils are light and fluid, they are mixed with aromatic oils without heating. Solid oils or butters have a high melting point and remain creamy or solid at room temperature.

Vegetable oils have no aroma, while they have the ability to fix the aroma and properties of essential oils, neutralizing possible aggressive manifestations of the latter. In cosmetology, base oils can be used on their own or as a vehicle that provides deep, safe penetration of essential oils.

We have combined vegetable oils into lines according to the content of the dominant fatty acid, which in turn has the greatest effect: moisturizing, restoring, nourishing or firming and toning.

COMPLETE MOISTURIZING

(Saturated fatty acids)

Johoba, Burdock

RESTORATION

(Polyunsaturated fatty acids Omega 3)

Hemp, Linseed

Evening Primrose, Rosehip

BASIC NUTRITION

(Polyunsaturated fatty acids Omega 6)

Grape seed, Walnut

Calendula, Sesame, Wheat

Germ, Safflower

Cotton Seeds, Celandine

FIRMNESS AND TONE

(Monounsaturated fatty acids Omega 9)

Apricot kernel, Avocado

Argan/Iron wood

St. John's wort, Castor, Macadamia

Sweet Almond, Peach Kernel

Pistachio, Chamomile

APPLICATION OF FATTY OILS

Enrichment of cosmetics

Nail and cuticle care

Massage

Masks, applications, compresses for face and body

Masks for hair and scalp

Skin care after bath/shower

Face skin cleansing

Baths for hands and nails

Skin care after sun

Vegetable oils can be used in pure form, mixed with other oils, as a base for essential oils.

“JOJOBA”

Simmondsia Chinensis Seed Oil

Country of origin: *Argentina/Peru*

Production method: *pressing*

Part of the plant used: *seeds*

Jojoba oil, which is a liquid wax, is obtained from the seeds of the evergreen shrub Simmondsia Chinensis. The composition of this unique cosmetic product includes amino acids, which in their structure resemble collagen, which is responsible for skin firmness. Fatty acids, fatty acid esters and a high content of vitamin E are also responsible for the excellent effect of this natural cosmetic product.

COSMETIC EFFECT:

- has a beneficial effect on the condition of the skin of the face, neck, décollete within basic or directed procedures due to its high moisturizing characteristics
- provides revitalizing care for damaged skin
- especially recommended for targeted care for oily and combination skin
- lightens shallow stretch marks, reduces the appearance of cellulite
- restores the softness of chapped lips, protects against chapping
- promotes skin healing due to its regenerating properties
- protects skin from harmful UV rays (SPF 4)
- removes excess sebum, cleanses hair and scalp
- moisturizes and protects dry, brittle, color-treated hair, giving it natural shine, strength and elasticity

“BURDOCK”

Arctium Lappa Root Oil

Country of origin: *Russia*

Production method: *extraction*

Part of the plant used: *roots*

It is obtained from the roots of burdock, which grows in Europe and Asia with a temperate climate. Burdock oil contains natural inulin, protein, palmitic and stearic acids, sitosterol and stigmasterol, tannins, mineral salts and vitamins.

COSMETIC EFFECT:

- moisturizes all skin types
- fights typical problems of mature skin, deeply nourishing it, saturating it with vitamins, smoothing, restoring a healthy look
- cares for dry skin of the face and body, eliminating peeling, helping to soften rough skin areas
- prevents the appearance of acne on oily skin by regulating the work of the sebaceous glands and normalizing the production of sebum
- nourishes and strengthens hair follicles, prevents hair loss and alopecia, accelerates hair growth
- restores weak and damaged hair structure after coloring and perm, giving hair softness and smoothness
- helps to reduce dandruff
- gently cares for the skin of the hands, strengthens the nail plate, softens the cuticle

RESTORATION

“HEMP”

Cannabis Sativa Seed Oil

Country of origin: EC

Production method: *pressing*

Part of the plant used: *seeds*

For the production of oil, seeds of hemp, an annual plant native to the central and western Asia, are used. Hemp oil contains a large amount of unsaturated fatty acids (linolenic, oleic, palmitic, stearic), vitamins A, B1, B2, B6, E, K, O, microelements and amino acids.

COSMETIC EFFECT:

- suitable for quality home care for all skin types
- restores dehydrated aging skin, makes it soft and elastic due to the high moisture-retaining abilities of its composition
- protects the skin from premature aging, reduces existing wrinkles and prevents the formation of new ones, smooths the skin and levels its texture
- fights the typical problems of oily, porous skin by regulating the work of the sebaceous glands, shrinking and cleansing the pores, eliminating oily sheen
- protects the skin of the hands and face from chapping, coarsening and peeling in the cold season
- protects skin and hair from UV exposure
- gives dry hair shine, flexibility, volume, facilitates styling

“EVENING PRIMROSE”

Oenothera Biennis Oil

Country of origin: *China*

Production method: *pressing/extraction*

Part of the plant used: *seeds*

It is obtained from the seeds of oenothera biennis containing 19-31% of oil. Primrose oil contains vitamins, minerals, linoleic, gamma-linolenic, oleic, palmitic, stearic acids.

COSMETIC EFFECT:

- in its pure form, it is used for emergency restoration of the health of sensitive damaged skin, it has an instant soothing effect, is used as an additional element in cosmetic blends that enhances the action of other base oils
- provides the skin with adequate nutrition and hydration
- smooths fine wrinkles, rejuvenates the skin and prevents premature aging
- evens out skin texture, lightens pigment spots and improves complexion
- restores hair, successfully solving the problems of hair loss, dandruff, slow growth, brittleness
- cares for the skin of the hands, softens the cuticle

“LINSEED”

Linum Usitatissimum Seed Oil

Country of origin: *Russia*

Production method: *pressing*

Part of the plant used: *seeds*

The raw material for oil manufacture is the seeds of common flax, an annual herbal plant of the flax family. The chemical composition of the oil includes vitamins F, A, E, minerals, fatty acids - up to 70% of triglycerides of linoleic and alpha-linolenic acids.

COSMETIC EFFECT:

- promotes deep nutrition and intense hydration of the skin, rejuvenates, prevents premature aging of the skin, reduces wrinkles and smooths relief
- restores sensitive skin
- softens dry skin, reducing peeling, eliminating the feeling of tightness
- soothes the skin after sunbathing
- cares for eyelashes, preventing their loss
- Hydrates dry hair, leaving it smoother, bouncier and more manageable
- supports nail health by strengthening the nail plate

“ROSEHIP”

Rosa Canina Oil

Country of origin: *Russia*

Production method: *maceration*

Part of the plant used: *fruits*

Obtained from dried and crushed rosehip seeds. Rosehip oil contains polyunsaturated fatty acids (linoleic, linolenic, oleic), vitamins A, C, E, micro- and macroelements - manganese, iron, potassium, magnesium, phosphorus, strontium, copper.

COSMETIC EFFECT:

- suitable for home natural care for oily, dry, sensitive, problem skin
- soothes sensitive skin
- improves the condition and appearance of dry skin due to high-quality intensive moisturizing
- slows down the aging process, has a noticeable rejuvenating effect, reducing wrinkles, smoothing the relief, brightening age spots
- gives the face a beautiful, healthy tone
- cares for the skin around the eyes
- lightens shallow stretch marks, reduces the appearance of cellulite
- softens and moisturizes rough, cracked skin of the feet, lips and hands
- protects the skin from damaging UV rays
- restoring softness and shine to the hair after dyeing and perm
- strengthens the nail plate, relieving nails from brittleness and delamination

BASIC NUTRITION

"GRAPE SEED"

Vitis Vinifera Seed

Country of origin: Italy

Production method: pressing

Part of the plant used: kernel

The raw material for production is the grape seeds (kernels), which are widely cultivated in many countries with a temperate subtropical climate. Popular in cosmetology oil is rich in linoleic acid. It contains vitamins, minerals, as well as a small amount of vitamin E, natural chlorophyll and valuable antioxidants (procyanides).

COSMETIC EFFECT:

- beneficial effect on the condition and appearance of any type of skin
- especially recommended for targeted care of oily and combination skin
- cleanses the skin, preventing its pollution and the formation of blackheads, tightens pores, eliminates oily sheen, mattifies
- slows down the aging process of the skin, promotes the rejuvenation of epidermal cells, increases elasticity, reduces wrinkles
- moisturizes the skin and maintains the necessary level of moisture for a long time
- provides a tonic and refreshing effect to dull skin
- takes care of the skin in the décolleté area, tightens, gives elasticity
- minimizes the external manifestations of cellulite, smoothing the skin relief in problem areas
- removes acne, showing its pronounced astringent properties
- restores the structure of dull and weakened hair

"WALNUT"

Juglans Regia Seed Oil

Country of origin: USA

Production method: pressing

Part of the plant used: kernels

Walnut oil is a natural leader in the content of vitamin E and omega-3 and omega-6 fatty acids, which make up to 77% of its substance. It also contains retinol and carotenoids, vitamins C, B, micro and macro elements – iodine, iron, calcium, magnesium, zinc, copper and others.

COSMETIC EFFECT:

- provides reliable care for any type of skin, deeply nourishing the skin, saturating it with beneficial substances
- recommended for targeted care of very dry skin, has a moisturizing and softening effect, relieves peeling
- improves skin elasticity and firmness, prevents wrinkles
- has a tonic effect and improves blood circulation
- soothes sensitive skin
- cares for dry and chapped lips
- promotes an even and beautiful tan, reducing the risk of sunburn

"CALENDULA"

Calendula Officinalis Oil

Country of origin: *Russia*

Production method:

extraction/maceration
The composition of calendula oil includes vitamins E, A, D, PP, B, essential oil, bitter components, saponins, flavonol glycosides. The chemical and fatty acid compositions vary depending on the base oil in which calendula is infused.

Part of the plant used: *flowers*

COSMETIC EFFECT:

- softens rough, cracked skin, helps smooth out stretch marks
- has a noticeable soothing effect on sensitive skin
- regulates the secretion of sebum, absorbs its excess, tightens pores
- helps reduce acne
- promotes cell regeneration, showing its antiseptic effect
- increases skin resistance to external factors – cold, wind, chemicals
- protects the skin from the harmful effects of the sun

"SESAME"

Sesamum Indicum Seed Oil

Country of origin: *Mexico*

Production method: *pressing*

Part of the plant used: *seeds*

The composition of sesame oil includes vitamins (E, B), minerals (calcium and phosphorus), protein, natural antioxidant lecithin, sesamol, sterols, squalene, sesamin and sesamol. The fatty acid composition is dominated by linoleic, oleic, palmitic acids.

COSMETIC EFFECT:

- saturates the skin of any type with nutrients
- moisturizes dry, flabby, fading skin, eliminating peeling and feeling of tightness, restoring elasticity and attractive look
- protects the skin from loss of elasticity due to pronounced moisturizing properties
- has a beneficial effect on the sensitive skin
- eliminates minor skin defects and brightens age spots
- helps to restore the protective functions of the epidermis, protecting the skin from external environmental influences
- represents a natural UV filter (SPF 2-4)
- takes care of hair, protects them from exposure to the sun, sea and chlorinated water
- restores hair after dyeing and perm, gives it shine, strength and volume

"WHEAT GERM"

Triticum Aestivum Germ Oil

Country of origin: *Russia*

Production method: *extraction*

Part of the plant used: grains

Wheat germ oil contains vitamins E, A, D, PP, B, iron, calcium, phosphorus, beta-carotene, lecithin, melatonin, squalene, phytosterols, zinc, iron, potassium, sulfur, phosphorus, allantoin.

COSMETIC EFFECT:

- deeply nourishes and moisturizes the skin of any type, maintaining the firmness and elasticity of the epidermis
- rejuvenates the skin, smooths relief, giving freshness and beauty even to mature skin
- relieves the condition of dry facial skin, saturating it with moisture, relieving the feeling of tightness
- stimulates the cleansing of oily and problematic skin, reducing the formation of acne, pimples, clogged pores, blackheads
- improves the complexion
- nourishes and moisturizes the delicate skin around the eyes
- softens cracked, chapped lips
- represents a preventive natural remedy for stretch marks
- protects skin from harmful UV rays
- restores and nourishes the structure of dyed, damaged, weakened hair, restoring their softness and shine

“SAFFLOWER”

Carthamus Tinctorius Seed Oil

Country of origin: *Germany*

Production method: *pressing*

Part of the plant used: *seeds*

The composition of chamomile oil includes flavonoids, glycosides, organic acids, vitamins (B1, B2, carotene), bitterness, triterpene alcohols, choline, phytosterol, coumarins, micro- and macroelements and essential oil.

COSMETIC EFFECT:

- relieves dry and excessively dry skin
- deeply moisturizes the skin, has a high moisture-retaining and moisture-regulating ability
- rejuvenates the skin, reduces the depth of wrinkles, having pronounced antioxidant properties
- takes care of sensitive skin
- heals damaged skin, stimulates cell regeneration
- protects the skin from the harmful effects of the sun
- suitable for healing care for overdried, weak, dull, brittle hair, restores smoothness, softness and elasticity to them, saturates them with natural strength and energy

“COTTON SEEDS”

Calendula Officinalis Oil

Country of origin: *Turkey*

Production method: *extraction*

Part of the plant used: *seeds*

The peculiarity of the oil is the high content of tocopherols, more than 70% of which are tocopherol A. The fatty acid composition is dominated by linoleic, palmitic, palmitoleic, oleic acids.

COSMETIC EFFECT:

- provides deep nutrition to dry, mature skin, beneficially influencing its condition and appearance
- restores damaged cellular structures, maintaining the necessary level of moisture in skin cells
- improves the structure of the skin, giving it smoothness and elasticity
- slows down the aging process, has a noticeable rejuvenating effect on the skin of the face and hands
- protects against the harmful effects of the environment, preventing chapping and peeling
- restores the skin after suntan, soothes, prevents drying
- takes care of dry and damaged hair, restoring their softness and natural shine

“CELANDINE”

Chelidonium Majus Oil

Country of origin: *Russia*

Production method: *maceration*

Part of the plant used: *leaves*

Celandine oil is obtained from the above-ground part of the plant of the same name. The composition of the oil includes alkaloids, carotene, vitamin C, saponins, flavonoids, bitterness, organic acids (malic, citric and succinic) and resinous substances.

COSMETIC EFFECT:

- represents a great natural tool for cleansing problematic skin
- helps deal with acne
- brightens age spots
- provides deep nourishment to the skin, increasing its smoothness and elasticity
- fights early wrinkles and cares for aging skin
- suitable for delicate care of delicate baby skin
- prevents hair breakage and improves their overall condition
- used for seborrhea and dandruff

“APRICOT KERNEL”

Prunus Armeniaca Kernel Oil

Country of origin: *Italy*

Production method: *pressing*

Part of the plant used: *kernel*

The beneficial properties of apricot are due to the quality of its composition, which includes mono- and polyunsaturated fatty acids, active vitamin F, vitamins A, B and C, tocopherols, phospholipids, potassium, magnesium, pantothenic acid.

COSMETIC EFFECT:

- provides reliable care for any type of skin, giving it firmness and tone, improving complexion, restoring a beautiful healthy tone to the skin
- revitalizes tired, aging skin
- provides high-quality nutrition and hydration of the skin of the face, neck, décollete
- with regular use, it visibly smooths the skin, reduces fine wrinkles, promoting the synthesis of elastin and collagen fibers
- restores the normal balance of problem and combination skin
- represents an ideal tool for complete care of dry skin, preventing peeling
- effective for the care of delicate skin of the lips and eyelids
- lightens shallow stretch marks, reduces the appearance of cellulite
- carefully cares for the skin, protecting it from chapping and temperature changes in the cold season
- restores the skin after burns due to pronounced regenerative abilities
- nourishes and softens hair, making it shiny and silky
- strengthens nails, preventing their fragility and delamination, softens cuticles, facilitating home care of hands

"AVOCADO"

Persea Gratissima Oil

Country of origin: *South Africa/South America*

Production method: *pressing*

Part of the plant used: *fruits*

This ideal cosmetic product for moisturizing and nourishing the skin contains vitamins A, B1, B2, C, D, E, F, H, PP, K, zinc, potassium, lecithin, phosphoric acid salts, squalene, phytosterols, fruit extracts, micro- and macronutrients. This oil also contains fatty acids: oleic, palmitic, linoleic, linolenic, palmitoleic, stearic ones.

COSMETIC EFFECT:

- provides reliable care for any type of skin, helping to improve the quality of the skin, giving it firmness and tone
- fights the signs of aging of mature, aging skin, with antioxidant properties thanks to the vitamins A and D in its content
- improves moisture and elasticity of the upper layers of dry, dehydrated skin

- has an anti-cellulite effect, smooths the skin surface
- cares for hair, preventing hair loss and stimulating their growth
- accelerates the growth of eyebrows and eyelashes
- reduces brittleness, restores strength and health of nails

"PEACH KERNEL "

Prunus Persica Kernel Oil

Country of origin: *Italy*

Production method: *pressing*

Part of the plant used: *kernel*

The composition of the popular cosmetic product includes vitamins A, P, E, C, group B, carotenoids, tocopherols, phospholipids, potassium, calcium, phosphorus, iron as well as oleic, linoleic, palmitic acids.

COSMETIC EFFECT:

- has a lifting effect, tightens the contour of the face, makes the skin more elastic
- rejuvenates the skin, smoothing superficial wrinkles, leveling the skin relief
- gently cares for dry, depleted skin, eliminating peeling and feeling of tightness, providing a softening effect
- gives the face a beautiful healthy color
- takes care of the delicate skin around the eyes
- softens the skin of the lips, protects against chapping
- lightens shallow stretch marks, reduces the appearance of cellulite
- softens and nourishes dry, brittle hair, restoring its smoothness and natural shine
- stimulates eyelash growth
- strengthens nails, softens cuticles

"PISTACHIO"

Pistacia Vera Nut Oil

Country of origin: *USA*

Production method: *pressing*

Part of the plant used: *kernels*

The fatty acid composition of pistachio oil is dominated by oleic, linoleic, palmitic acids.

COSMETIC EFFECT:

- gives firmness and improves skin tone
- rejuvenates aging, fading skin, slows down the aging process, reduces existing wrinkles due to pronounced antioxidant characteristics
- relieves sensitive skin
- lightens age spots and freckles, smoothing the skin tone
- protects the skin from aggressive environmental influences, preventing chapping and peeling
- is a natural fragrant UV filter, minimizes the risk of sunburn
- takes care of the condition of the hair, restoring the structure, strengthening the hair follicles
- cares for the skin of hands and nails, strengthening the nail plate

"CHAMOMILE"

Chamomilla Recutita Oil

Country of origin: *Russia*

Production method: *maceration*

Part of the plant used: *flowers*

The composition of chamomile oil includes flavonoids, glycosides, organic acids, vitamins (B1, B2, carotene), bitterness, triterpene alcohols, choline, phytosterol, coumarins, micro- and macroelements and essential oil.

COSMETIC EFFECT:

- suitable for basic home care for the face and body, improving the firmness and tone of any skin type
- softens, nourishes and moisturizes dry, sensitive, depleted skin
- is a natural remedy for the prevention of wrinkles on the face, neck, around the eyes
- cleanses oily skin, normalizes metabolic processes and the functioning of the sebaceous glands
- takes care of sensitive skin
- smooths the skin
- improves complexion, refreshes the skin, giving it a beautiful natural tone
- stimulates tissue regeneration
- lightens shallow stretch marks, reduces the appearance of cellulite
- restores hair structure
- gives a beautiful golden tint to blond hair
- helps to strengthen nails

NATURAL SOLID BUTTER OILS

Butters are solid plant oils that have a high content of saturated glycerides. The solid oils mainly contain stearic and unsaturated oleic acids, the main action of which is moisturizing and giving elasticity to the skin.

Stearic acid gives butters the ability to regulate the overall thickness of the cream, which is why butter oils are used as a thickener in the formulation of natural cosmetics. They can also be used as a natural substitute for stearic acid.

Many butters in their composition contain a high concentration of unsaponifiable fraction (mainly triterpene esters and phytosterols). They have a rejuvenating effect, soothe sensitive and restore damaged skin.

All solid oils are excellent emollients, moisturizers. They repair damaged skin and increase elasticity. Butter oils restore the lipid layer of the skin, so that they stimulate the natural regeneration of the skin and increase its ability to retain moisture, forming an inert membrane on the skin surface.

"COCOA"

Theobroma cacao seed butter

Production method: *pressing*

Part of the plant used: *seeds*

Cocoa butter moisturizes, revitalizes and tones dry, aging skin. It has smoothing properties, fights age-related changes. It helps to get rid of stretch marks after pregnancy and weight loss. It protects the skin from chapping and frostbite in winter. It is effective for lips and eye area. It is suitable for children's skin.

"COCONUT"

Cocos nucifera seed butter

Production method: *pressing*

Part of the plant used: *fruits*

Coconut butter moisturizes the skin of any type, regenerates the upper layers of the epidermis, relieving inflammation and irritation. It protects against the formation of cracks on the hands and heels. It calms the skin after suntan. It protects hair and skin from harmful UV rays (SPF 7). It restores damaged hair, makes them smooth and shiny. It activates hair growth.

"SHEA"

Butyrospermum parkii butter

Production method: *pressing*

Part of the plant used: *fruits*

Shea butter perfectly moisturizes, smooths, softens the skin of any type, stimulates the synthesis of natural collagen. It protects lips against drying out and chapping. It restores hair structure and helps to get rid of split ends. It is suitable for baby skin care.

"CUPUACU"

Theobroma Grandiflorum Seed Butter

Production method: *pressing*

Part of the plant used: *fruits*

Cupuacu butter is ideal for moisturizing dry, mature skin. It restores tone and elasticity, relieves irritation and inflammation, helps to eliminate dermatitis. It protects the epidermis from harmful sun exposure. It gives strength and vitality to colored hair, helps to maintain color. It can be used on children's skin.

"MANGO"

Mangifera indica seed butter

Production method: *pressing*

Part of the plant used: *fruits*

Mango butter moisturizes the skin of any type, protects against drying, gives the face a beautiful even color. It heals microcracks and rashes on the skin. It soothes the epidermis after suntan. It restores softness to cracked and chapped lips. It accelerates the process of resorption of small scars, spots, cicatrices. It strengthens brittle hair, facilitates combing. It is suitable for baby skin care.

"PALM"

Elaeis Guineensis Jacq. Butter

Production method: *pressing*

Part of the plant used: *fruits*

Palm butter is suitable for moisturizing normal, dry and aging skin, eliminates dryness and peeling. It perfectly tones the skin, increases its firmness and elasticity, rejuvenates. It has anti-inflammatory properties. It is ideal for protecting skin and hair from external influences. It restores the structure, eliminates dryness and brittleness of damaged, dyed hair. It strengthens the nail plate.

"BABASSU"

Orbignya Speciosa Kernel Oil

Production method: *pressing*

Part of the plant used: *seeds*

Babassu oil is suitable for moisturizing the skin of any type, saturates it with nutrients, softens, gives a healthy radiant look. It protects the delicate skin of the lips from drying out and chapping. It gives vitality to dry brittle hair. It is ideal for baby skin care.

"LAUREL"

Laurus Nobilis Leaf Oil

Production method: *pressing*

Part of the plant used: *leaves*

Laurel oil perfectly moisturizes oily and combination skin, relieves irritation and inflammation, eliminates acne, eczema, psoriasis. It enhances the nutrition of hair follicles, reduces hair fragility and stimulates their growth, eliminates dandruff and seborrhea.

NATURAL BEAUTY OILS

Simple natural formulas that work.

The new line Botavikos is a fragrant collection of ready-made 100% plant-based formulas, where primary importance is given the powerful cosmetic or emotional accents of active ingredients – essential oils.

Elemi, black pepper, marigold, cumin, celery, petitgrain, palmarosa, fennel, marjoram, litsea cubeba – exotic, rare essential oils, unique live essences of beautiful plants, endowed with deep meaning for the beauty of skin, hair and harmony of emotions.

We wanted to draw your attention to these extraordinary specimens, to tell you more about them than you know, to tell your skin its natural secrets.

FEATURES

BOTAVIKOS BEAUTY AND EMOTIONAL OILS

Botavikos Beauty Oils are cosmetic oils with the most delicate texture and exquisite aromas, created taking into account the unique properties of essential oils and designed to solve common problems of hair or face and body skin – mimic wrinkles, acne, oily sheen, dull complexion, uneven tan, age spots, lack of moisture, poorly healing bruises, weak brittle hair, dandruff and much more.

The active ingredient of each Botavikos Beauty Oil is always one essential oil, the properties of which allow you to work punctually and harmoniously on solving a specific cosmetic problem, and its aroma has an additional aromatherapeutic effect. The action of the essential oil is supported by a complex of two or three basic plant oils – macadamia, sunflower, safflower, hazelnut, pomegranate, blackcurrant, burdock or castor oils. The combination of these oils is also determined by the unique aim of the product. The plant base enriches the composition with nutritional properties, has a regenerating effect on the stratum corneum of the skin, thus providing a complete daily care.

- **A simple, pure, effective formula that makes every ingredient work.** The active action of the essential oil to solve specific problems of the skin or hair is supported by plant oils, which, like bricks, restore the stratum corneum of the skin, protecting it from external factors and preserving youth, and in hair products they provide additional nutrition and strengthening.
- **Working concentration of essential oil in each formula.** The percentage of essence depends on the characteristics and cosmetic recommendations of each oil.
- The **waterless formulation** allows us to avoid the use of synthetic preservatives that can be toxic. Each product, with the observance of simple conditions of use, is stored for 2 years from the date of manufacture and 6 months after opening the package.
- **Aromatherapy effect.** Natural mono-flavors add sophistication to your daily skin or hair care with Botavikos Beauty and Emotional Oils.
- The collection follows the principles of responsible consumption, offering effective **formulations from 100% natural ingredients.**

Botavikos Emotional Oils is a small aromatherapy collection, the active ingredients of which are selected taking into account the psycho-emotional power of essential oils. Some are able to calm down, reduce stress, set you up for relaxation, meditation, harmony, others, on the contrary, bring you into tone and concentrate your attention.

We recommend using Emotional Oils for aroma massages, as body oils, or pre-packaged fragrant bath mixes. In each case of application, against the background of an aromatherapeutic effect, you will also receive additional cosmetic skin care: softening, nourishing, increasing elasticity and smoothness. Botavikos Emotional Oils can be applied to bioenergy points – temples, wrists, between the eyebrows.

INGREDIENTS WE USE

The action of the essential oil is supported by a complex of two or three basic plant oils – macadamia, sunflower seeds, safflower, hazelnut, pomegranate, blackcurrant, burdock or castor oils.

The combination of these oils is also determined by the functional task of the product and provides complete skin and hair care.

Pomegranate has moisturizing, protective and nourishing properties. It contains a high amount of fatty acids, helps the skin produce collagen, acts as a trap for free radicals. It promotes the regeneration of damaged skin cells. It prevents the appearance of wrinkles, increases skin elasticity and turgor, improves skin color.

St. John's wort is a powerful antioxidant. It is ideal for problematic, oily and mixed dehydrated skin, it prevents moisture loss, normalizes the composition of the hydrolipidic layer of the skin.

Castor oil has long been popular for hair care, eyelashes, eyebrows. It is suitable for skin care and nutrition.

Hazelnut nourishes, restores the water-lipid barrier. It smooths and tightens the skin.

Macadamia eliminates irritation, peeling. It restores the softness and tenderness of the skin. It differs a high content of palmitoleic acid, a monounsaturated acid, which helps to restore the skin, especially with aging skin. It acts as an antioxidant that prevents the destruction of cell membranes in the skin.

Burdock restores metabolism in the scalp, nourishes and strengthens the roots and hair structure, accelerates hair growth, stops hair loss, restores weak and damaged hair structure.

Safflower is rich in vitamins K and E, has a high moisture-retaining and moisture-regulating ability and is well absorbed by any type of skin.

Sunflower seeds have antioxidant, antiseptic, nourishing, moisturizing, softening properties. It contains many useful properties and vitamins A, D and E in abundance, improves blood circulation, promotes the resorption of cicatrices and scars. It softens the skin, smooths deep wrinkles. It is perfect for hair care, especially brittle, dry, dehydrated.

Blackcurrant has regenerating, moisturizing and smoothing properties. It maintains skin elasticity, thanks to the presence of vitamin C stimulates collagen synthesis. It helps restore the barrier function of the skin.

Cosmetic oil for cleansing and reducing pores

"CITRONELLA"

Cymbopogon Winterianus

Citronella essential oil improves skin condition thanks to its toning and regenerating properties, tightens pores.

RESULT:

fresh skin, cleansed pores, more even complexion without oily sheen.

BEAUTY CARE:

It helps to reduce the production of sebum, cleanses qualitatively, narrows pores, eliminates unnatural shine, evens out the relief. It is an ideal tool for solving typical oily skin problems.

Additional active ingredients in the composition – hazelnut and sunflower seed oils – provide basic skin care, nourishing, softening and protecting it from external influences. They also enhance the effect of essential oil, stimulating faster access of essential oil to problem areas.

AROMATHERAPY CARE

The aroma of citronella essential oil is cheerful and fresh with a sweetish-woody background. It gives a charge of vivacity and good mood. It eliminates negative thoughts, apathy, indifference. It stimulates concentration. Aphrodisiac, aimed at increasing activity.

Cosmetic oil for strengthening and growth of eyelashes and eyebrows

"BAY"

Pimenta Racemosa

It is effective for insufficient hair growth in the eyebrow area, improves the condition and appearance of fragile and weakened eyelashes.

RESULT:

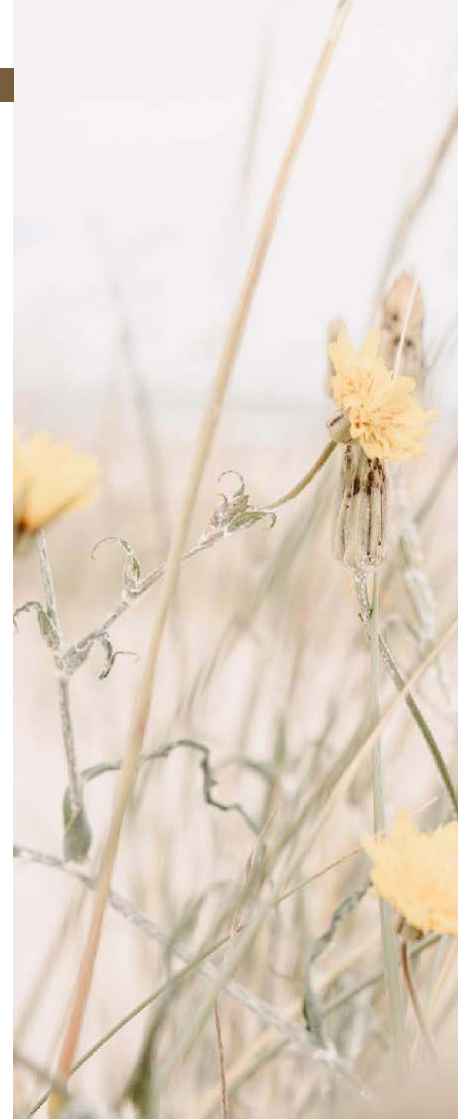

longer lush thick eyelashes and beautiful natural well-groomed eyebrows.

BEAUTY CARE:

The oil obtained from the leaves of the tropical tree of the same name is indispensable for restoring natural care for eyebrows and eyelashes. With regular application, the bay oil enhances the metabolism of hair follicles, prevents hair loss, and stimulates their growth. Active plant oils in the formula — burdock, castor and macadamia oils — restore the damaged structure of hairs after using decorative cosmetics and protect them against external influences. Plant oils also provide nutrition to hair follicles and activate the growth of eyelashes and eyebrows.

AROMATHERAPY CARE

The complex aroma of bay essential oil with a fresh spicy top note and a sweet hot aftertaste warms and uplifts. It is saving during periods of overwork. It increases immunity.

Cosmetic oil to reduce mimic wrinkles

“VETIVER”

Vetiveria Zizanioides

Vetiver, having a regenerating ability, perfectly copes with small mimic wrinkles, smooths the skin, makes it more elastic and fresh.

RESULT:

fresh, firm skin, reduction of mimic wrinkles.

BEAUTY CARE:

Vetiver essential oil has a beneficial effect on any type of the skin, tones and gives a rested look. Vetiver, having a regenerating ability, perfectly copes with small mimic wrinkles, smooths the skin, makes it more elastic and fresh. Additional plant components – sunflower seed and pomegranate oils – contribute to faster access of the essential oil to problem areas. They take care of tired, dehydrated skin, protecting it from external influences, and have a lifting effect.

AROMATHERAPY CARE

The complex, persistent aroma of vetiver essential oil is distinguished by woody, earthy, smoky shades, designed to relax and soothe, relieve accumulated tension, and set you up for a calm and comfortable sleep.

Cosmetic oil-elixir to preserve youthful skin

"GUAIAIC WOOD"

Pimenta Racemosa

Regular use of the oil helps to prolong the youthfulness of the skin, minimizes the first signs of aging by increasing the epidermal tone.

RESULT:

a clearer oval of the face, décollete tightening, reduction of wrinkles.

BEAUTY CARE:

It has a powerful antioxidant charge. It is indispensable for maintaining the elasticity of the skin in the décollete area. It has a lifting effect, forming a clearer oval of the face. Additional active ingredients – plant oils of pomegranate and sunflower seeds — are easily distributed over the skin and are well absorbed, contributing to a better penetration of the essential oil into the deeper layers of the skin. They take care of mature, aging, tired skin, energizing and improving its overall quality indicators, restore a healthy complexion, slow down the aging process thanks to the natural nutrition of the epidermis.

AROMATHERAPY CARE

Sensual deep earthy aroma of essential oil of guaiac wood, revealing languid shades of tea rose, vanilla, violet, smoke. It is suitable for meditation. It relaxes the central nervous system. As a powerful aphrodisiac it awakens desires and fantasies, as well as causes a surge of strength and energy

Cosmetic supernourish facial oil

“GURJUN BALM”

Dipterocarpus Turbinatus

It is ideal for tired, depleted skin, emergency care for damaged, weathered areas that require intensive nutrition in winter.

RESULT:

smooth radiant facial skin, intensive nutrition.

BEAUTY CARE:

It effectively stimulates the respiration of skin cells, giving smoothness, softness and natural radiance. The active plant oils of safflower and sunflower seeds in the composition enhance the nourishing effect of the Gurjun Balm, soothe sensitive skin, and protect against negative external influences.

AROMATHERAPY CARE

The woody aroma of Gurjun Balm, filled with sweetness and warming energy, has a positive effect on the mind, harmonizes the nervous system, and helps in moments of stress and depression.

Cosmetic oil to restore and improve complexion

“ZDRAVETS”

Geranium Macrorrhizum

The oil has a regenerating effect on skin cells, tones, refreshes, improves complexion. It forms the necessary level of moisture and gives elasticity.

RESULT:

fresh rested radiant skin, even tone, less visible age spots.

BEAUTY CARE:

It is rich in plant waxes and suitable for the care of any type of skin during an unfavorable period. Uneven complexion, lack of tone, hyperpigmentation, inflammation, peeling of the skin are problems that the Zdravets essential oil solves effectively when included in regular skin care procedures. The whitening properties of Zdravets essential oil help to solve the problem of hyperpigmentation. Other active ingredients in the composition of the cosmetic mixture – plant oils of sunflower seeds and pomegranate – also promote recovery through intensive nutrition. Maintain the beauty and health of the skin, increasing turgor and evening out tone.

AROMATHERAPY CARE

Woody notes on the background of the basic herbaceous, floral aroma of Zdravets bring peace and tranquility, fight seasonal depression, and relieve headaches.

Cosmetic repair oil after sun, cold and wind exposure

“HYSSOP”

Hyssopus Officinalis L.

It restores the ability of tissues to regenerate quickly, relieves itching, soothes sensitive areas, relieves peeling and redness, moisturizes the skin, gives elasticity and radiance.

RESULT:

smooth soft skin in any weather.

BEAUTY CARE:

It is ideal for restoring the skin after aggressive external factors – excessive solar activity, low temperatures, cold wind. Having an active anti-inflammatory effect, hyssop gently copes with skin reactions to traumatic stimuli. Additional plant-based ingredients in the composition – macadamia and sunflower seed oils, contribute to a deeper penetration of the essential oil into the skin, multiplying its effect.

AROMATHERAPY CARE

The aroma of hyssop essential oil with its sweet camphor top note and warm spicy-herbal plume is indispensable for nervous exhaustion, depression, and in stressful situations. It creates a complete feeling of comfort and warmth. Gets out of depression.

Cosmetic oil for skin elasticity and firmness

“CARDAMON”

Elettaria Cardamomum

It has a regenerating effect on skin cells and smooths mimic wrinkles.

RESULT:

tighter skin, excellent tone, radiance.

BEAUTY CARE:

It is a plant tonic for the skin, gives the necessary hydration to tired and aging skin, restores elasticity and healthy appearance, gives natural radiance. Plant oils of macadamia and sunflower seeds in the composition show their antioxidant properties, rejuvenating the skin and giving elasticity. They have a lifting effect when caring for sensitive skin around the eyes.

AROMATHERAPY CARE

The aroma of cardamon essential oil with a sweetish spicy background, a light camphor shade and subtle citrus notes has an invigorating effect, eliminates laziness, drives out of a state of drowsiness, inspires optimism for life and adjusts to well-being. It relieves anxiety and fear. It represents an aphrodisiac.

Cosmetic correction oil for fighting acne

“CORIANDER”

Coriandrum Sativum

With regular use, it visibly cleanses and tightens pores, evens out the epidermal relief, effectively copes with inflammatory processes, eliminates blackheads and reduces acne.

RESULT:

reduction of acne, healthy smooth skin without oily sheen.

BEAUTY CARE:

The essential oil obtained from mature coriander seeds is indispensable for targeted care for oily acne-prone skin. Coriander simultaneously shows its cleansing and healing abilities - it reduces skin greasiness, gradually normalizing the fat balance. Additional ingredients are plant oils of hazelnut and sunflower seeds. They support the action of the essential oil in acne skin care - they nourish, cleanse, tighten pores, help eliminate blackheads, give softness, smoothness, and velvety.

AROMATHERAPY CARE

The warm, sweet, woody-spicy aroma of coriander essential oil with a hint of musky in the plume relieves fatigue, apathy, excitement, and nervous tension. Its aroma has also been shown to improve memory and concentration. It represents an aphrodisiac.

Cosmetic tonic oil against oily shine and enlarged pores

“LITSEA CUBEBA”

Litsea Cubeba

The essential oil obtained from the fruits of the Litsea tree, thanks to its natural composition, is indispensable for gentle tonic care for oily skin.

RESULT:

more matte smooth skin without oily sheen.

BEAUTY CARE:

The oil visibly cleanses and narrows enlarged pores, reduces the production of sebum, normalizing the lipid balance of the epidermis. The antiseptic properties of Litsea Cubeba essential oil help to soothe inflamed areas. With regular use, it has a tonic effect, restoring the ability of the epidermis to quickly regenerate tissues – the relief and complexion are noticeably evened out, the skin becomes fresh and radiant.

AROMATHERAPY CARE

The sonorous aroma of litsea cubeba with a lemon background, on which sweet, fruity, floral and fresh shades harmoniously intertwine, relieves depressive states, restores strength during periods of overexcitation and overwork. It also harmonizes biorhythms, promotes restful sleep.

Cosmetic oil for lightening age spots

"CELERY"

Apium Graveolens

Celery oil has a natural lightening power. Without injuring the skin, it effectively fights pigment spots of various origins.

RESULT:

even skin tone, less noticeable age spots.

BEAUTY CARE:

The oil effectively fights age spots of various origins – age spots that appeared during pregnancy or from excessive exposure to the sun. With regular application, it visibly brightens age spots, evens out skin tone, improves complexion, and refreshes. Plant oils – macadamia and sunflower seeds – enrich the formula with nourishing and protective properties, provide complete care, and contribute to a better distribution of cosmetic oil over the skin.

AROMATHERAPY CARE

The strong spicy aroma of celery essential oil with sweetish candy notes is able to simultaneously maintain emotional tone and calm the nervous system, tunes in a positive way, returns the joy of life.

Cosmetic oil for care of the skin around the eyes

"PARSLEY SEEDS"

Petroselinum Grispum

Parsley seeds refresh, tone, moisturize, strengthen the skin around the eyes, give it elasticity.

RESULT:

fresh rested radiant skin, even tone, less visible age spots.

BEAUTY CARE:

caring for the delicate and vulnerable skin around the eyes. Thanks to its natural composition, parsley oil effectively eliminates signs of fatigue, reduces puffiness of the eyelids and dark circles under the eyes. Parsley essential oil refreshes, tones, moisturizes, strengthens the skin around the eyes and gives it elasticity. Additional plant components – pomegranate and sunflower seed oils – not only contribute to the rapid access of essential oil to problem areas, but also provide the necessary nutrition to the sensitive area, restore tone, rejuvenate, smooth out small wrinkles.

AROMATHERAPY CARE

The aroma of parsley essential oil is voluminous, sweetish, with a woody-spicy background and a green note, restores energy reserves and increases brain activity during high nervous stress, mental and physical overstrain.

Cosmetic oil for elimination of peeling and irritation

"CHAMOMILE"

Chamomilla Recutita

The essential oil obtained from chamomile flowers effectively fights the problems of dry sensitive skin, providing gentle delicate care to overly vulnerable areas of the face.

RESULT:

smooth, clean, moisturized skin without irritation and dryness.

BEAUTY CARE:

Relieves itching, irritation, removes peeling, alleviates the condition of inflamed skin. With regular application, it shows its whitening abilities, restores a healthy vibrant complexion. Additional plant components – safflower and sunflower seed oils – actively support the action of chamomile essential oil. Deep nourishment and restoration of the lipid layer alleviate the condition of dry skin.

AROMATHERAPY CARE

The persistent aroma of chamomile essential oil, saturated with sweetish, fruity, tart-herbaceous hues, has a stabilizing, balancing meaning. It fights fears, anxieties, nervous tension. It restores restful and comfortable sleep.

Cosmetic oil for hair reconstruction from the root to the very tips

“CALAMUS”

Acorus Calamus

Calamus oil stimulates hair follicles, accelerating growth and strengthening hair along the entire length, gives strength, shine, silkiness.

RESULT:

strong beautiful hair with natural shine, increased volume, healthy hair ends.

BEAUTY CARE:

It has a beneficial effect on damaged, thinned and overdried hair. It is used to prevent and stop hair loss. It effectively copes with the problem of split ends thanks to the necessary nutrition and hydration. Plant oils – castor, burdock and macadamia oils – complement the active effect of the calamus. They are able to restore weak and damaged hair structure after dyeing and perm.

AROMATHERAPY CARE

The aroma of calamus essential oil is persistent and tart, its woody-spicy shades soothe the nervous system during stress and overstrain, fill it with energy, literally giving a second wind. It relieves conditions at headaches and migraines.

Cosmetic oil against hair loss and dandruff

“BIRCH TAR”

Oleum Rusci

Birch tar essential oil stimulates the renewal of the upper layer of the scalp, restores the balance of oily skin and effectively fights dandruff. It has strong anti-parasitic properties.

RESULT:

longer lush thick eyelashes and beautiful natural well-groomed eyebrows.

BEAUTY CARE:

The oil fights dandruff and relieves itching. In parallel, stimulating the metabolism of hair follicles, birch tar accelerates hair growth, improves their quality and increases volume. Carefully selected additional active ingredients in the formula – plant oils of St. John's wort and sunflower seeds, have a calming effect on the scalp, strengthen hair, preventing hair loss and accelerating their growth.

AROMATHERAPY CARE

The pronounced aroma of birch tar essential oil with persistent notes of smoke, resin and leather is designed to relieve fatigue, increase physical and mental strength.

Cosmetic toning oil for hair and scalp

“NUTMEG”

Myristica Fragrans

It has a beneficial effect on the condition of the scalp, tones, relieves itching and peeling.

RESULT:

healthy scalp, stronger strong hair with natural shine and well-groomed tips.

BEAUTY CARE:

The oil is aimed primarily at maintaining the beauty of the hair or restoring it with insufficient volume and loss. By increasing the blood circulation of the scalp, nutmeg strengthens the hair follicles, stimulates hair growth, makes them thick and strong, restores smoothness along the entire length. Plant oils – castor, burdock and macadamia oils – complement the active effect of the nutmeg. They are able to restore strength and shine to overdried, brittle hair, damaged by frequent dyeing, incorrect aggressive drying and perm.

AROMATHERAPY CARE

The aroma of nutmeg essential oil is spicy, warm, with a sweetish intoxicating astringency and notes of smoke. It warms, restores strength after quarrels, conflicts, stressful situations.

Cosmetic oil for stimulation of hair growth

"PIMENTA"

Elettaria Cardamomum

Pimenta essential oil, obtained from the sun-dried fruits of the soul of pure pepper, is indispensable for the care of weakened, tired, damaged hair with insufficient growth.

RESULT:

accelerated hair growth, smooth hair with natural shine, strength and volume.

BEAUTY CARE:

It stimulates the blood circulation of the scalp and tones the hair follicles, prevents hair loss, accelerates their growth. It moisturizes, energizes, makes hair strong and shiny. Additional plant components in the composition – castor, burdock and macadamia oils – give hair the necessary nutrition, protect against adverse external factors, care for damaged areas, enhancing the effect of essential oil and creating favorable conditions for accelerated hair growth.

AROMATHERAPY CARE

The burning aroma of pimenta oil, filled with spicy sharp fresh notes, is a natural antidepressant. It stops fears, obsessive anxious thoughts, relieves tension, gives strength and is a powerful motivator for action.

Cosmetic oil for strengthening the hair

"BLACK PEPPER"

Piper Nigrum

By stimulating the blood circulation of the scalp, black pepper activates the hair follicles, makes the hair stronger and stronger, increases volume, and accelerates growth.

RESULT:

It strengthens, restores and accelerates hair growth, moisturizes the scalp, stops itching; hair loss prevention

BEAUTY CARE:

The oil obtained from unripe dried black pepper fruit is effective for strengthening thin, weakened hair. It is used to prevent hair loss. It has a beneficial effect on the condition of the scalp. It moisturizes, relieves dryness and uncomfortable itching. Plant oils – castor, burdock and macadamia oils – complement the active effect of the black pepper. They restore the structure of dry and depleted hair, prevent brittleness due to the necessary nutrition.

AROMATHERAPY CARE

The hot, spicy, woody-spicy aroma of black pepper essential oil is fraught with two positive energies - warming and stimulating. It eliminates apathy, depression, indifference and adjusts to positive action.

Cosmetic balancing scalp oil

"CUMIN"

Carum Carvi

Essential oil obtained from cumin seeds, suitable for directed natural care for oily scalp, dandruff prevention

RESULT:

clean, fresh scalp, reduced greasiness at the roots.

BEAUTY CARE:

It restores the balance of the scalp, normalizing the sebaceous glands. With regular use, it gives a feeling of freshness, relieves hair roots from rapid pollution. Cumin oil is a natural remedy for the treatment and prevention of dandruff. Other active ingredients in the composition – castor, burdock and sunflower seed oil – normalize the fat balance, strengthen the hair roots, provide the scalp with the necessary nutrition.

AROMATHERAPY CARE

The aroma of cumin essential oil is strong, sharp with a characteristic spice and sweetness, replenishes the reserves of lost energy, tones, restores readiness for vivid emotions, fights stress, apathy, and depression. It represents an aphrodisiac.

Cosmetic oil for fighting corns and hardened areas of the skin

"MARIGOLD"

Tagetes Minuta

It effectively softens corns and calluses, improves the condition of the skin on the elbows and feet thanks to enhanced nutrition and regenerating effects.

RESULT:

smooth soft leather on the feet and elbows.

BEAUTY CARE:

The oil contained in the above-ground part of flowering plants – small marigolds – is indispensable for directed restorative care for dry, rough skin. It effectively softens corns and calluses, improves the condition of the skin on the elbows and feet thanks to enhanced nutrition and regenerating effects. Marigold oil has an antimicrobial effect; as an additional herbal remedy, it can be used for treating fungal infections of the feet and nails. Additional active ingredients – plant oils of sunflower seeds and safflower – also provide care for excessively dry skin, showing their moisturizing and moisture-retaining properties. It visibly softens the skin in problem areas, removes peeling and gives smoothness.

AROMATHERAPY CARE

The multifaceted aroma of marigold oil combines floral, fruity and citrus notes with a sweetish spice. It brings calm and harmony, clarifies the mind, allows you to better control emotions.

Cosmetic oil tonic for smoothing the skin relief

"GALBANUM"

Ferula Galbaniflua

Galbanum essential oil is suitable for the care of aging and problematic skin of the face and body thanks to its active regenerating abilities.

RESULT:

more even fresh skin, less noticeable scars and stretch marks.

BEAUTY CARE:

It restores skin elasticity after sudden weight loss, helps reduce stretch marks in the abdomen and chest. With regular use, it restores smoothness and elasticity to the skin of the face, gives the skin a uniform tone. Reduces mimic wrinkles, smooths scars and eliminates post-acne defects. Macadamia and sunflower seed oils are active plant ingredients that contribute to a better distribution of the composition over the skin and faster access of the essential oil to problem areas. They provide the necessary nutrition to dry, mature skin, have an additional lifting effect.

AROMATHERAPY CARE

In the rich, spicy and bitter, green aroma of galbanum, against the background of the prevailing coniferous and resinous tones, the smell of musk, apples, and lemon is recognized. This extensive fragrance relieves nervous tension, gently soothes, relieves the symptoms of seasonal depression, and helps with aerophobia.

BODY CARE

Cosmetic oil for relief of muscle tension after training

"WINTERGREEN"

Gaultheria Procumbens

Vetiver, having a regenerating ability, perfectly copes with small mimic wrinkles, smooths the skin, makes it more elastic and fresh.

RESULT:

rapid restoration of muscle fibers after sports, reducing the risk of injury.

BEAUTY CARE:

It contains plant oils of sunflower seeds and safflower – the basic components in the composition – contribute to faster access of essential oil to problem areas, comfortable distribution of the mixture over the skin and ideal glide during massage. They also nourish the skin, give tone and firmness, soften, relieve dryness.

AROMATHERAPY CARE

The intense, fresh aroma of wintergreen oil with a woody-fruity base and warm, sweet caramel undertones inspires and invigorates. Methyl salicylate – the main component of the essential oil, has a calming effect, carries a warming relaxing energy. These features make wintergreen oil an indispensable natural tool for relieving muscle tension after training.

Cosmetic oil for skin care after epilation

"COPAIBA BALSAM"

Copaifera Officinalis

Copaiba balsam soothes the injured epidermis, helps to eliminate irritation, redness, peeling, and is a prophylactic against ingrown hairs.

RESULT:

smooth beautiful skin without irritation and ingrown hairs after epilation.

BEAUTY CARE:

The oil obtained from the resin of the tropical *Copaifera* tree has a high bactericidal and disinfecting activity, suitable for soft natural skin restoration after epilation. It cares for the skin, nourishing and moisturizing it, softens and makes it smooth. Plant oils of safflower and sunflower seeds allow the composition to be easily distributed over the skin, enhance the effect of the essential oil. They take care of sensitive skin after the epilation procedure, heal minor damage, relieve dryness, forming the necessary nutritional base.

AROMATHERAPY CARE

The unobtrusive aroma of Copaiba balsam with a predominant woody-spicy background with peppery hints symbolizes peace and tranquility, gives a feeling of peace and security.

Cosmetic oil for resorption of hematomas and bruises

"MARJORAM"

Origanum Majorana

It soothes the skin, relieves pain, reduces swelling.

RESULT:

faster resorption of hematomas and bruises, removal the swelling.

BEAUTY CARE:

The oil has an active anti-traumatic and regenerating effect, accelerates the process of resorption of hematomas and bruises. Plant oils in the composition – macadamia and sunflower seeds – soften the skin, contribute to a better distribution of the composition over the skin and faster access of the essential oil to problem areas.

AROMATHERAPY CARE

The optimistic evening aroma of marjoram essential oil features a spicy woody-tart background with a sweetish tinge. It removes anxiety and stress, helps to get rid of sadness and confusion, return to a positive track, improves sleep.

Deodorizing cosmetic oil for foot

"Petitgrain"

Citrus Aurantium L.

It effectively relieves burning sensation, swelling, heaviness in the legs caused by physical exertion and fatigue. It has an antifungal effect.

RESULT:

no unpleasant odor, swelling, burning, moistened soft skin of the feet.

BEAUTY CARE:

Derived from the shoots and leaves of the bitter orange, petitgrain essential oil has a reputation as a natural deodorant that eliminates odor and reduces sweating around the feet. Plant ingredients in the formula – macadamia and sunflower seed oils – help to better distribute the composition over the skin and faster access of the essential oil to problem areas. They nourish the skin of the feet, relieve dryness, make it smooth and soft.

AROMATHERAPY CARE

The aroma of petitgrain is fresh, floral-citrus, with a woody-herbal tint, it is productive for depression, sleep disturbances, overwork, fills with strength and energy, harmonizes, gives self-confidence.

Cosmetic oil for even and beautiful tan

"CARROT SEEDS"

Daucus Carota

The essential oil obtained from the seeds of wild carrots is a natural tanning cream that "attracts" the sun's rays and at the same time cares for the skin.

RESULT:

even saturated tan, smooth moisturized skin.

BEAUTY CARE:

It will make the tan more intense and bright. Carrot essential oil, nourishing and moisturizing the skin, protects it from overdrying in the sun, smooths the relief, gives radiance. Other plant components in the composition - safflower and sunflower seed oils – are a caring base that allows the oil to be well distributed over the skin and quickly absorbed. They also show their moisture-retaining abilities, preventing dryness and flaking, soften the skin, give it smoothness and elasticity.

AROMATHERAPY CARE

The warm dry aroma of carrot essential oil with a woody-earthy background restores mental and physical strength, energizes and invigorates. It gives confidence, returns vitality, improves mood.

Cosmetic oil for the care of the decollete area

"FENNEL"

Foeniculum Vulgare

The essential oil obtained from crushed fennel seeds is indispensable for rejuvenating skin care of the neck and decollete area, which require intensive nutrition and hydration.

RESULT:

more toned, smooth, well-groomed skin in the neck and decollete area.

BEAUTY CARE:

The natural composition of fennel oil provides the necessary hydration of the skin, tightens, restores firmness, tone. With regular use, it eliminates sagging, makes the skin more elastic.

Base plant oils – safflower and sunflower seeds – are additional active ingredients in the composition. Demonstrating their moisture-retaining and antioxidant properties, they smooth the skin, tone up, and also help to better distribution of the composition and faster access of the essential oil to problem areas.

AROMATHERAPY CARE

The aroma of fennel essential oil, in which earthy and pepper shades appear on a sweet anise background, soothes, reduces the level of anxiety, removes fears, excessive excitement. It harmonizes and balances emotions.

Cosmetic oil for strengthening and growth of nails

"ELEMI"

Canarium Luzonicum

Exotic elemi essential oil, obtained from the resin of tropical same-named trees, carefully and effectively cares for nails and the skin around the nails, prolongs the freshness of manicure.

RESULT:

healthy strong nails and well-groomed skin around the nails.

BEAUTY CARE:

It strengthens weak, exfoliating brittle nails, prevents the growth of the cuticle, noticeably softens the skin around the nails due to intensive natural nutrition and hydration.

Additional active ingredients in the formula – blackcurrant and sunflower seed oils – enhance the effect of essential oil, soften rough skin, saturate the nail plate with nutrients.

AROMATHERAPY CARE

The soft tart herbal aroma of elemi essential oil with sensations of lemon, lime and incense, woody notes helps with mood swings, during periods of tension and stress, nervous perception, restores the harmony of the physical and emotional sphere. It returns a comfortable sleep, relieving insomnia.

Cosmetic anti-stress oil for peace of mind

“Oregano”

Origanum Vulgare

The aroma of oregano essential oil creates emotional balance, helping to cope with increased irritability and impulsiveness caused by stress.

RESULT:

good mood, lack of irritability.

BEAUTY CARE:

More commonly known as oregano, this oil lightens shallow breakouts and evens out the surface of the skin with regular use. Additional components in the composition – plant oils of sunflower seeds and macadamia – contribute to a comfortable distribution of the mixture over the skin. Being sources of fatty acids and vitamins, they intensively nourish the skin, give tone and firmness, soften, relieve dryness.

AROMATHERAPY CARE

It is indispensable in times of mental tension and stress. It soothes, relaxes the nervous system, relieves insomnia, setting up a comfortable healthy sleep. The aroma of oregano essential oil creates emotional balance, helping to cope with increased irritability caused by stress.

Cosmetic oil against fatigue

“Camphor”

Cinnamomum Camphora

Camphor oil is a carrier of pacifying energy. It gently relaxes during periods of intense stress and overwork, relieves mental and physical fatigue.

RESULT:

increased efficiency, lack of apathy, cheerfulness and vigor.

BEAUTY CARE:

Base components in the composition – plant oils of sunflower seeds and macadamia – contribute to a perfect distribution of the mixture over the skin. Against the background of aromatherapy action, they provide cosmetic skin care. The soften, even out the relief, tone the skin, activate its protective functions.

AROMATHERAPY CARE

The essential oil, obtained from the wood and roots of the camphor tree, has a sharp, pungent aroma with light spicy undertones, reminiscent of the smell of eucalyptus. Camphor oil is a carrier of pacifying energy, relieves mental and physical fatigue. It relieves headaches and migraines caused by a debilitating stress regimen.

Cosmetic oil to set the mood

“Palmarosa”

Daucus Carota

In especially difficult periods of life, it helps to restore strength, adapts to new conditions, returns energy and joy.

RESULT:

optimism, good mood.

BEAUTY CARE:

The oil softens the skin, has a slight lifting effect, evens out the relief.

Base components – plant oils of sunflower seeds and macadamia – contribute to a good distribution of the mixture over the skin. They provide cosmetic skin care thanks to their tonic and nourishing properties.

AROMATHERAPY CARE

Palmarosa essential oil has a delicate aroma filled with sweet floral notes with a soft spiciness and a candy overtone. This light morning aroma is able to cheer up and fill you with optimism.

Cosmetic oil for concentration

“Thuja”

Thuja Occidentalis

It is indispensable in critical periods of life that require the utmost concentration.

RESULT:

concentration of attention while driving a car, before exams, when making responsible decisions.

BEAUTY CARE:

Base components – plant oils of sunflower seeds and macadamia – contribute to a perfect distribution of the mixture over the skin. They soften, rejuvenate and increase skin firmness and elasticity.

AROMATHERAPY CARE

Thuja oil, obtained from needles and cones, has a strong fresh aroma with a resinous camphor base and tart viscous shades. It is indispensable in critical periods of life that require the utmost concentration. It gives general tone, restores strength in case of overwork and helps to concentrate before making important decisions. It is suitable for increasing the attention of drivers while driving.

PRODUCT COMPOSITIONS – ESSENTIAL OILS
