When we developed these products, first of all we thought that children's skin was special

Leader's word

As a mother of three children, I wanted to create cosmetics that can be completely trusted — vegetable, without unnecessary ingredients, so that each jar was filled with nature. When we developed these products, first of all we thought that children's skin was special — it is delicate, sensitive, much thinner than that of adults, vulnerable, has a high level of permeability, hence the tendency to irritation, redness, allergic reactions. The range also contains universal products that are suitable for both baby and mom — yes, we wanted to take care of mom's skin too. After all, in the time after the childbirth, a woman's skin, which is affected by hormones, also requires special sensitive care.

Therefore, in the functional line of clinically tested products for baby and moms BOTAVIKOS, we use safe ingredients. Vegetable oils, plant extracts, flower water — all active ingredients are recommended for baby skin care and are ideal for mom's skin. In each product we added a drop of organic pure lavender oil — a symbol of peace and restful sleep.

Biocosmetic products of the baby's series are a unique combination of natural ingredients

- **Witch hazel flower water** is the basis of each product, for delicate care of sensitive skin. Effectively relieves redness, irritation, soothes the skin and enhances the hydration of the layer of cornea. The peculiarity of witch hazel is the high contents of tannins, which have an astringent effect, form a protective layer on the skin and have an antibacterial effect.
- **Plant extracts (chamomile, cotton, licorice, chicory, mallow, motherwort, melissa)** for the gentle care of the baby's skin. Extracts protect from external influences, soften the skin, soothe irritated areas.
- **Vegetable oils (sweet almond, jojoba, grape seed, babassu, coconut, cocoa)** in body care products for safe hydration and nutrition of the skin.

- 
- **Organic lavender essential oil*** for a light, barely audible scent which gently soothes the baby's nervous system, creating a feel of security, gives a restless sleep.
 - **Vegetable wax from sprouted barley grains** for the formation of the skin's water-fat balance and protection from the negative effects of external factors.

All the ingredients in the composition are designed to carefully and effectively care for the skin of mom and baby from birth

* lavender essential oil is recommended for children from an early age
